

Learn it. Prove it. Get hired.

FOR THE PEOPLE LEARNING. AND FOR THE COMPANIES HIRING THEM.

Five live career tracks, rebuilt every month from the questions real interviews are actually asking. An AI tutor that never sleeps. Mock interviews that call your phone. And a hiring engine on the other side.

50/day

Real interviews monitored by our AI

~90%

Of interview questions come from our material

98%

Of candidates who attend interviews get placed

1 year

Unlimited live batches & recordings

Colleges hand you a degree. Nobody hands you a career.

So we built a machine.

Studies

~50 real interview transcripts, every day

Teaches

exactly what companies ask right now

Drills

you until pressure feels normal

Hunts

jobs with you until you sign an offer

THE SYLLABUS ENGINE — REBUILT MONTHLY

This syllabus was not written. It was reverse-engineered.

STEP 01 — LISTEN

Our Claude-based AI monitors up to 50 real & mock interviews every single day.

STEP 02 — EXTRACT

It collects the actual questions companies are asking for this role, this month.

STEP 03 — REBUILD

The syllabus is rebuilt around real demand — you study only what's actually asked.

50/day

Real interviews monitored by our AI

~90%

Of interview questions come from our material

98%

Of candidates who attend interviews get placed

1 year

Unlimited live batches & recordings

*Based on BrowseJobs internal data. Historical figures — not a promise of individual outcome. Hiring depends on the live market and your performance.

Everything between where you are and the offer letter.

YOUR PATH — EVERYTHING IS FREE UNTIL STEP 04

FREE · 01**Free counselling + written Career Analysis Report**

Talk to us. You leave with a written report on where you stand and what to do — whether you join or not.

FREE · 02**Free live Masterclass**

See the method live. How the syllabus is reverse-engineered from real interviews, and what you'd actually study.

FREE · 03**Free 7-hour Python Bootcamp**

Sit a real teaching day before you decide. Seven hours of live Python — no card, no commitment.

STEP 04**Registration — ₹30,000**

Only after all three free steps. EMI available: 3 × ₹10,000. Then full enrolment and LMS access.

WHATEVER YOU'RE STARTING FROM

SWITCHING DOMAINS?

The real, industry-grade projects you build here become the centerpiece of your CV — hands-on work in the new domain, fully genuine, fully BGV-safe.

CAREER GAP?

A structured internship with us, built around projects you actually deliver, fills your timeline with documented work. A gap is only a gap if it's empty.

FRESHER?

Earn a free internship certificate with BrowseJobs.ai — the equivalent of six months of hands-on experience before your first interview.

READINESS IS DECIDED ON DATA

We send you to interviews when your mock scores say you're ready — not when a sales target says so. That is precisely why our attend-to-place rate is what it is.

One fee. The whole machine.

No add-on pricing for the things that get you hired. Every tool below ships with every track.

LEARN

AI Tutor — awake at 2am

Every doubt answered in seconds, in your context, from your syllabus. Students ask it hundreds of questions a course, because it never judges and never sleeps.

Live batches + recordings

Every class is live and instructor-led, then recorded and searchable by topic. Your access runs a full year, so a missed class is never a lost one.

Coding Lab

Browser-based labs with the real stack. You write, run and break things inside the LMS — no local setup standing between you and practice.

Content Hub & lesson notes

Per-lesson notes, slides and reference material, generated against the day's teaching plan and kept with the recording.

PROVE

Voice Mock Lab — the interviewer that calls you

A voice AI rings your phone, runs a real technical round, and scores every answer on depth, communication and confidence. By the twelfth mock, the real thing feels like a rerun.

Weekly technical + HR mocks

Human-led mocks alongside the AI ones, AI-analysed afterwards, each returning a written gap report rather than a grade.

PRI & the mastery map

A Placement Readiness Index built from your mock data, attendance and assignments — with one clear next best action every day.

Live interview question bank

The questions pulled from monitored interviews for your role this month, organised round by round.

Quizzes, assignments & graded feedback

Scored work with trainer feedback, so readiness is a measurement rather than an opinion.

GET HIRED

Job Radar

Live roles from LinkedIn and Naukri matched to your skill graph and refreshed daily, so the openings are already waiting when you are ready.

ATS resume, LinkedIn & GitHub

Your CV rebuilt to survive the filter, your LinkedIn tuned for recruiter search, your GitHub arranged around the projects you actually shipped.

Verifiable certificates

Every certificate carries a QR code that resolves to a public verification page. An employer checks it in one scan.

1:1 mentoring & support desk

A mentor for the career decisions and a ticketed support desk for everything else, both inside the LMS.

Five live tracks. Every one rebuilt monthly.

Only five — because demand decides what we teach. We run tracks only where the market is actively hiring, and every one now carries an applied agentic-AI module.

EVERY TRACK, THE SAME SPINE — live instructor-led classes with recordings · 1 year unlimited access · CV-ready projects you deploy · weekly AI-analysed mocks · a question bank rebuilt monthly · placement support until you accept an offer.

Data Engineering

DE

Pipelines, warehouses, and the modern data stack.

6 months · 10 modules · 4 CV-ready

Python

SQL

Pandas

PySpark

Apache Spark

AWS (S3, Glue, Redshift, Lambda, EC2)

Includes “Agentic AI for Data Engineering”

DevOps & Cloud

DC

Ship, scale, and run production systems.

6 months · 12 modules · 5 CV-ready

Linux

Bash

Git

GitHub

Docker

Kubernetes

Includes “Agentic AI for DevOps”

AI Engineering

AE

Agents, RAG and MCP — shipped to production.

6 months · 12 modules · 5 CV-ready

WAITLIST

ServiceNow

WAITLIST

Register your interest and we will tell you when a batch opens.

Two fees. Both in writing. One only after you're hired.

Registration (payable only after the free masterclass + bootcamp)	₹30,000
EMI option for registration	3 × ₹10,000
Placement fee — due only after you accept an offer	First 3 months' CTC
Paid as	6 monthly EMIs from your new salary
Your ₹30,000 registration	Adjusted inside the placement fee

WORKED EXAMPLE · ₹12 LPA OFFER

3 months' CTC = ₹3,00,000 — ₹30,000 already paid = ₹2,70,000 in 6 EMIs — paid from a salary you didn't have before. We only earn properly when you do.

What we promise — in writing

- ✓ Every commitment you get from us is in writing.
- ✓ Three full steps are free before you pay a rupee.
- ✓ The placement fee is due only after you accept an offer.
- ✓ 30-day money-back guarantee — any reason, full refund.
- ✓ Every counselling call is recorded & AI-monitored.

What we will never tell you

- ✗ “We guarantee you a job.” Nobody honestly can — the market decides.
- ✗ “We'll adjust your experience.” We never fabricate employment.
- ✗ A fixed salary promise.
- ✗ That hiring is certain, or that there's a shortcut.

Interview the shortlist. Not the inbox.

The same engine that grades our students runs the hiring pipeline on the other side. A role goes in; a ranked, screened, interviewed and evidenced shortlist comes out — and a human still makes every decision that matters.

THE HIRING PROCESS, END TO END

STEP 01 • JOB DESCRIPTION

Drop the JD. It fills itself in.

Paste a JD, or start from a title and a few bullets. The AI drafts the structured role — skills, experience band, locations, knockout questions — and flags requirements that are too vague to screen against. You publish it, not the AI.

- Draft from a title + notes, or extract structure from a pasted JD
- Tagged skills drive the matching; experience band and CTC band are yours to set
- Vague requirements flagged before they cost you a bad shortlist

STEP 02 • APPLICATIONS & THE GRADED POOL

Ranked, with the reason written down.

Graded applicants rank on top, each with a short explanation of why they placed where they did — citing skills, mock evidence and readiness signals. Ungraded applicants sit below with a one-click invite to the mock.

- “Why #1 is #1” — a written rationale per candidate, not a bare score
- Knockout questions and hard filters applied before ranking
- Bulk advance, or reject with a templated, candidate-respectful reason

STEP 03 • AI SCREENING CALL

The first call is placed for you.

An AI caller dials the shortlist automatically and has the conversation your recruiter would have had first — then files the transcript, the recording and a read on how it went.

- Auto-dialled from the queue; no answer returns the candidate to the queue, not the bin
- Full transcript and call recording attached to the candidate record
- Outcome and sentiment captured, so the next step is already decided

STEP 04 • INTERVIEW ROUNDS

L1, L2, or a round you design.

Rounds run async and proctored — the candidate is notified on WhatsApp or email and completes within a window you set. L1 to L2 can unlock the same day.

- Question source per JD: your own bank, AI-generated, or blended
- Custom rounds insertable — coding round, assignment, whatever you run
- Proctored like the mocks: face-match, window-switch and snapshot flags

STEP 05 · PIPELINE & AUTOMATION

Watch every stage move.

Kanban or table, one board per role. Every transition — yours or a rule's — is an event with the actor named on the candidate's timeline.

- Applied → Graded → Shortlisted → L1 → L2 → Offer, plus stages you insert
- Rules on thresholds and SLAs: “mock ≥ 70% → shortlist”, “no review in 24h → nudge”
- Simulate a rule before enabling it, against your last 30 days of applicants

STEP 07 · DECISION & OFFER

A written brief before you meet anyone.

Your team gets a graded report per candidate — every round, every score, every flag — so the first human conversation starts at the interview, not at CV triage.

- Round-by-round breakdown with scores and reasoning
- Screening-call transcript and proctoring record in the same view
- Hiring-manager comments and @mentions kept internal to your workspace

STEP 06 · EVIDENCE & INTEGRITY

See the proof, not just the score.

Every round leaves evidence you can inspect: the replay, the transcript beside it, per-dimension scores, and the proctoring record — with flags shown as evidence for a human to weigh.

- Video replay with a seekable transcript — click a line, the video jumps
- Per-rubric scores, so you can see which dimension carried the result
- Proctoring flags with snapshot evidence and warning counts

How hiring changes.

Before

- ✗ Post the role, wait for the inbox to fill
- ✗ Recruiter reads hundreds of CVs by hand
- ✗ Chase candidates for notice period and CTC
- ✗ Half the L1 slots are no-shows or mismatches
- ✗ You meet the candidate before you have any evidence

With BrowseJobs

- ✓ JD in, structured role out — same sitting
- ✓ Ranked shortlist, each rank explained in writing
- ✓ AI screening call confirms the basics first
- ✓ L1/L2 run only on candidates who cleared the screen
- ✓ Replays, transcripts and scores waiting before your first meeting

Illustrative example of the process, not a performance claim. Actual volumes, timelines and outcomes depend on your role, your market and your selection bar.

Two ways to work with us.

YOUR OWN APPLICANTS

Run your own pipeline

Publish the JD, point your inbound applicants at it, and they arrive graded and ranked in your workspace. Your team runs the decisions; the platform does the screening.

- Your workspace, your JDs, your roles and permissions
- Inbound applicants graded and ranked against your bar
- Invite anyone already in your hands to take the JD's mock
- Optional CRM layer, configured to your hiring model

OUR CANDIDATE POOL

Run it as an agency engagement

No recruiter, no sourcing team, no problem. We run the whole pipeline on the BrowseJobs graded pool and hand you finalists with the full paper trail.

- Sourcing from the BrowseJobs graded candidate pool
- We operate JD, shortlist, screening and rounds
- You receive the graded report per finalist
- Scales up and down with your open roles

WHAT IT COSTS

First 6 months — full pipeline, no card, no lock-in

Free

Agency model

8% of CTC

Per interview

Shared on the call

Nothing is charged without a written agreement first. Rates are confirmed in writing before any engagement starts.

ON THE ROADMAP — NOT AVAILABLE YET

- **Run it on your own stack** — A public employer API, HMAC-signed webhooks and CSV/ATS import, so the pipeline reads and writes against the systems you already have.
- **Full background verification** — A Trust Score built from DigiLocker ID, PAN, education certificates and EPFO employment history — with each component and its status shown, never a black box.
- **Semantic candidate search** — Describe the person in a sentence and get matches back, with the interpretation shown as chips you can remove. Saved searches and match alerts alongside.

The people who did it, on the record.

★★★★★ DEVOPS

"Big thanks to Trainer Krish for being such a motivating and knowledgeable guide. Your way of teaching with real-life examples made everything so easy to understand. You're not just a trainer, but a true mentor!"

KR Sampritha

★★★★★ DATA ENGINEERING

"The course is super well-structured, covering everything from ETL processes to data storage tools. Instead of just theory, I got to work on actual data pipelines and industry-relevant case studies."

Anish Lakumarapu

★★★★★ DATA ENGINEERING

"I would like to sincerely thank BrowseJobs for their incredible support in helping me find a job. Krish Sir, you are doing a wonderful job in helping students who dream of working in the IT industry."

Saket Vaibhav

★★★★★ DEVOPS

"I recommend BrowseJobs to anyone looking to advance their career in IT. The course was comprehensive, well-structured, and tailored. My tutor was always available to clear any doubts."

Hiring partners connected

2013

London est. · India since 2020

*Based on BrowseJobs internal data. Historical figures – not a promise of individual outcome. Hiring depends on the live market and your performance.

Don't trust us. Verify us.

Fifteen minutes on Naukri is enough to check everything we claim. Here's how.

CHECK 01 · 5 MIN

Count the demand

Open Naukri → search the role + your city → filter "Last 7 days" → count the postings. If hiring is real, you'll see it in the number.

CHECK 02 · 5 MIN

Read 5 job descriptions

Note the skills that repeat. Then compare them against any institute's syllabus — ours included. A syllabus that doesn't match live JDs is preparing you for the wrong exam.

CHECK 03 · 5 MIN

Pressure-test everyone

Ask every institute: will you put every promise in writing? Is your success rate defined clearly? Do you guarantee a job? Compare the answers.

Start here.

Students — start with everything free.

Free counselling with a written career report, a free live masterclass, and a free 7-hour Python bootcamp. Then, and only then, decide.
