Pricing & Packages

Three tiers, two price lists, and one meter that actually moves.

COMMERCIAL

IBROWSEJOBS TECHNOLOGIES PVT LTD · 2026 EDITION

Commercial in confidence. Prepared for evaluation by the named recipient and not for onward distribution.

PACKAGES

Three tiers.

Tiers are enforced by per-tenant feature flags, so moving between them is a configuration change rather than a migration. Every tier is whitelabel — your name, your logo, your palette — from the first one.

Starter

UP TO 100 ENROLLED

A single-location institute running its first cohorts.

INDIA	INTL
₹24,999/mo	\$499/mo

AI INCLUDED EVERY MONTH
AI Assist for 25 students · 150 voice minutes (≈10 mock interviews)

- ✓ Full LMS: curriculum, live classes, assignments, quizzes, certificates
- ✓ Student portal on a browsejobs.ai subdomain
- ✓ Whitelabel name, logo and colour palette
- ✓ Standard mock interviews (no voice AI)
- ✓ Email support, next business day

Capped active students · single admin workspace · shared infrastructure

Growth

UP TO 500 ENROLLED

An institute running admissions and placement as a business.

INDIA	INTL
₹74,999/mo	\$1,499/mo

AI INCLUDED EVERY MONTH
AI Assist for 100 students · 400 voice minutes (≈27 mock interviews)

- ✓ Everything in Starter
- ✓ Full institute CRM: leads, campaigns, fees, finance, HR, support desk
- ✓ Your own domain
- ✓ Voice mock lab and AI tutor, with a monthly AI allowance
- ✓ Placement pipeline and job feed
- ✓ Priority support with a defined response SLA

Higher student cap · AI usage beyond the allowance billed as overage

Enterprise

UP TO 1,500 ENROLLED, THEN PER SEAT

Multi-branch groups, or institutes with their own compliance bar.

INDIA	INTL
₹1,99,999/mo	\$3,499/mo

AI INCLUDED EVERY MONTH
AI Assist for 250 students · 800 voice minutes (≈53 mock interviews)

- ✓ Everything in Growth
- ✓ Employer workspace and hiring pipeline
- ✓ Dedicated database instance
- ✓ Custom integrations and data migration
- ✓ Named account manager and a contractual SLA
- ✓ Security review support and a signed DPA

Scoped per engagement

All prices ex-GST. Monthly rate on an annual commitment; add 20% for month-to-month. Final terms are set on the order form; nothing is charged without a written agreement first.

WHAT THE LICENCE REPLACES

TIER	OUR LICENCE	STACK TODAY	THAT STACK, ITEMISED
Starter	₹24,999 / mo	≈ ₹22,500	Classplus ₹15,000 + CRM ₹2,500 × 3 seats
Growth	₹74,999 / mo	≈ ₹51,000	Classplus ₹15,000 + CRM ₹4,500 × 8 seats
Enterprise	₹1,99,999 / mo	≈ ₹2,15,000	Teachmint ₹1,25,000 + CRM ₹4,500 × 20 seats

No vendor sells LMS, institute CRM, placement and AI mocks as one product, so the comparison is against the stack a partner already pays for – not counting the staff time that stitches it together. Published or third-party-reported list prices, August 2026: indicative, not quotes. Sources are listed in the cost model.

THE METERS

One month of platform costs cents. One voice mock costs dollars.

That single fact decides the whole commercial shape. Everything a student consumes in a month — video, storage, compute, messaging — is a fraction of what one fifteen-minute voice interview costs to run. So the platform is licensed, and voice is metered.

METER	WHAT IT COVERS	INDIA	INTL
AI Assist — Per AI-active student, per month	Tutor, auto-grading and written mock-interview analysis.	₹199	\$3.00
AI Voice mock — Per minute, on our voice keys	A 15-minute mock interview costs about ₹375.	₹25	\$0.40
AI Voice mock — Per minute, on your own Vapi/Twilio keys	Orchestration only — you hold the vendor contract and the bill.	₹6	\$0.10
Extra enrolled seat — Per seat, per month, beyond the tier band	Charged on enrolment, not on activity.	₹35	\$0.60

WHAT ONE STUDENT COSTS US TO SERVE, PER MONTH

PLATFORM video delivery, recording storage, compute and WhatsApp for one active student · **AI ASSIST** a month of tutor questions, auto-grading and written mock analysis · **VOICE MOCK** one fifteen-minute call, platform and telephony · **FOUR** the weekly-mock programme for one student for one month.

Modelled cost of service, not price. Built bottom-up from published vendor rates — CDN, object storage, model tokens, voice platform, telephony — in the cost model workbook. The axis is linear on purpose: the gap is the point.

WHAT FOLLOWS FROM IT

Seats can be sold generously and minutes cannot. Doubling a partner's enrolled seats costs us cents per student; doubling their included voice minutes costs dollars per student. That is why the licence bands are wide, the voice allowance is narrow and stated in the order form, and the partner who wants unlimited voice is offered their own keys rather than a bigger bundle.

Prepaid voice blocks.

Voice is the only line where our margin is genuinely thin — roughly half of what you pay is a third party's invoice. Blocks make the volume discount visible and bounded rather than negotiated deal by deal.

BLOCK	MINUTES	PRICE (INDIA)	EFFECTIVE RATE
Trial	500 minutes	₹12,499	₹25.00 / min
Standard	1,000 minutes	₹24,999	₹25.00 / min
Volume	5,000 minutes	₹1,14,999	₹23.00 / min
Institutional	20,000 minutes	₹4,19,999	₹21.00 / min

India list. Blocks do not expire while the subscription is live. Usage beyond a block, or without one, is billed monthly in arrears at the standard rate.

ONE-TIME FEES

ONE-TIME FEE	WHAT IT COVERS	INDIA	INTL
Onboarding & implementation	Branding, data model, first cohort live. Six phases, described in document 06.	₹1,25,000	\$2,500
Data migration, per source system	Extract, map, dry run, cutover. One fee per system you are migrating from.	₹40,000	\$999
Custom domain + branded app store listing	Your domain on the platform, and your own listing under your developer account.	₹49,999	\$999

WHY AI IS METERED AND NOT BUNDLED

Voice mock interviews, the AI tutor and AI screening calls carry a genuine per-call cost. The platform already records purpose, model, tokens, cost and latency for every AI call, per tenant. A flat unlimited fee would make the heaviest user the worst margin — the partner getting the most value would be the one we most want to lose — so each tier carries a stated allowance and everything beyond it is billed against that record.

THREE WAYS TO BUY

MODEL	HOW IT WORKS
Licence subscription	A monthly or annual platform fee by tier, plus a one-time onboarding fee. Predictable for both sides, and the default.
Revenue share	A lower platform fee against an agreed share of course revenue. Suits a partner starting from zero cohorts who would rather pay as they grow.
Per-seat enrolment fee	A flat fee per enrolled student with no monthly minimum. Suits seasonal or cohort-driven institutes.

NEGOTIATING

What may be discounted.

A concession on a licence is recoverable. A concession on included voice minutes is not — it changes the cost of serving that partner every month for the life of the contract.

CONCESSION	WHAT MAY BE GIVEN
Annual prepay	Two months free — a 16.7% effective discount. The standard concession.
Two-year commitment	20% off the licence, invoiced annually in advance.
Reference partner	Onboarding fee discounted to cost, in exchange for a named case study and a reference call. Discount the onboarding fee, never the licence: the licence is what renews.
Voice allowance	Not a concession. Included minutes are stated in the order form and are the single most expensive thing that can be given away — at 2,500 included minutes the Growth tier margin halves, and at 5,000 it is negative.
Floor	No licence below 55% gross margin without founder sign-off.

WHAT A VOICE CONCESSION COSTS — GROWTH TIER AT ₹74,999

INCLUDED MINUTES / MO	WHAT THAT IS	GROSS MARGIN	VERDICT
0	None — voice sold separately	75.5%	Healthy
400	The Growth allowance	68.8%	Target
1,000	A generous concession	58.9%	Above the floor
2,500	Half the margin gone	34.0%	Founder sign-off
5,000	Loss-making	−7.4%	Never

Gross margin on cost of service, from the Sensitivity sheet of the cost model. Excludes R&D, sales and G&A, so the contribution margin is materially lower than each figure shown.

HOW IT IS PRICED

Five axes.

AXIS

WHY

Active students per month	The primary meter. It tracks the value a partner gets and scales with their success rather than their headcount.
AI usage	The second meter, and the one that moves. A month of platform for one student costs us cents; a single 15-minute voice mock costs dollars. Each tier includes an allowance so the AI demonstrates itself; beyond it, usage is billed against the metered record. A partner who would rather hold the vendor relationship can bring their own voice keys and pay orchestration only.
Modules enabled	Tiers are enforced by the per-tenant feature flags the platform already reads, so a package is a configuration rather than a different build.
Deployment	Shared infrastructure by default; a dedicated database instance is an Enterprise option.
Support tier	Response times and escalation path, set out in the SLA.

BILLING NOTES

- ✓ Fees are quoted exclusive of GST. Indian invoices carry GST at 18%.
- ✓ Listed rates are the monthly price on an annual commitment. Month-to-month is 20% higher.
- ✓ AI usage above the tier allowance is billed monthly in arrears against the metered record in `ai_events` — purpose, model, tokens, cost and latency, per call, per tenant.
- ✓ Voice minutes may be prepaid in blocks, or billed in arrears at the standard rate. Prepaid blocks do not expire while the subscription is live.
- ✓ Third-party costs on your own accounts — Zoom, payment gateway, WhatsApp — are never marked up by us.
- ✓ Annual commitments are invoiced in advance; monthly plans in advance, per month.
- ✓ The onboarding fee is one-time and is due before implementation begins.
- ✓ International pricing is billed in USD. The INR and USD price lists are independent, not an FX conversion of one another.
