6 months • LIVE ONLINE • BENGALURU

2026 EDITION

EVERY PROMISE IN WRITING • EVERY CALL RECORDED & AI-MONITORED

Most institutes teach a syllabus. We prepare you for the interview.

The problem with every other course: fixed syllabi written years ago, packed with topics no interviewer asks about — while the questions that decide your offer change every quarter. You spend months studying, then walk into interviews prepared for the wrong exam.

THE SYLLABUS ENGINE — REBUILT MONTHLY

This syllabus was not written. It was reverse-engineered.

STEP 01 — LISTEN

Our Claude-based AI monitors up to **50 real & mock interviews** every single day.

STEP 02 — EXTRACT

It collects the **actual questions** companies are asking for this role, this month.

STEP 03 — REBUILD

The syllabus is rebuilt around real demand — **you study only what's actually asked.**

50/day

real interviews monitored by our AI

~90%

Why Data Engineering is the hottest job of the 21st century

Data is the new oil — and Data Engineers are the architects of this digital economy. From powering AI to enabling data-driven decisions, their impact is everywhere. The demand is skyrocketing; the opportunity is now.

1.1M

global job postings for Data Engineers (2024)

50%

CAGR in the global data industry

400K

demand-supply gap in India & the US

55%

average salary hike for our graduates*

Market figures are industry estimates from public sources. Salary-hike figure is BrowseJobs internal data — not a promise of individual outcome.

Built for your situation. Judged on your outcomes.

SWITCHING DOMAINS?

The real, industry-grade projects you build here become the centerpiece of your CV — hands-on work in the new domain, fully genuine, fully BGV-safe.

CAREER GAP?

A structured internship with us, built around projects you actually deliver, fills your timeline with documented work. A gap is only a gap if it's empty.

FRESHER?

Earn a free internship certificate with BrowseJobs.ai — the equivalent of six months of hands-on experience before your first interview.

WHAT YOU'LL WALK OUT ABLE TO DO

- ✓ Design and ship production data pipelines — batch and streaming — on AWS and Azure
- ✓ Answer the SQL, Spark and system-design questions asked in this month's interviews
- ✓ Build and orchestrate medallion-architecture ETL on Databricks and Delta Lake
- ✓ Walk interviewers through four real projects you built and deployed yourself
- ✓ Explain your work clearly and confidently — communication is a scored module here

ROLES THIS PREPARES YOU FOR

Data Engineer

Big Data Engineer

ETL Developer

Analytics Engineer

Cloud Data Engineer

PROGRAM FORMAT

Duration	6 months
Format	Live online + recordings
Access	1 year unlimited
Projects	4 CV-ready

"We qualify you on data points, not emotions. Your mock-interview data decides when you're ready — and then the market meets you."

— DR. KRISH BHARGAV, FOUNDER & MENTOR

The live syllabus. Rebuilt monthly from real interviews.

9 modules. Zero filler. Every topic below appeared in a monitored interview for this role — that is the only reason it is here.

MODULE 01

Python for Data Engineering

Core Python through to the depth interviewers actually probe.

- Intro, variables, data types, casting, strings, booleans
- Operators, lists, tuples, sets, dictionaries
- If-else, loops, functions, lambda functions
- Classes, objects, inheritance, iterators, polymorphism
- Scope, modules, dates, math, JSON, RegEx, PIP
- Try-except, user input, file handling

MODULE 02

Pandas & Data Wrangling

The library every data interview assumes you know cold.

- Pandas intro, Series, DataFrames
- Read CSV, read JSON, analyze data
- Cleaning empty cells, wrong formats, duplicates
- Correlations and Pandas plotting

MODULE 03

SQL & Data Modeling

The round that decides most Data Engineering interviews.

- Select, distinct, where, order by, and/or/not
- Insert, update, delete, null handling
- Min/max, count, sum, avg, like, wildcards, in, between, aliases
- Joins: inner, left, right, self · group by, having, exists, case
- Stored procedures, operators
- Create/drop/alter DB & tables, primary & foreign keys, views
- Window functions, star & snowflake schemas, query optimization

MODULE 04

Apache Spark & PySpark

Distributed processing — the single biggest differentiator on your CV.

- Architecture, SparkSession, SparkContext, cluster managers
- RDDs, parallelize, repartition/coalesce, broadcast variables, accumulators
- DataFrames: StructType/StructField, select, collect, withColumn, withColumnRenamed
- where/filter, drop/dropDuplicates, orderBy, groupBy, joins, union, unionByName
- UDFs, transform/apply, map/flatMap, foreach
- SQL functions: aggregate, window, date/timestamp, JSON, pivot, partitionBy, fillna

MODULE 05

AWS for Data Engineering

The exact services named in current job descriptions.

- Cloud computing benefits, EC2 (types, pricing, scaling, auto-scaling)
- S3, RDS, Redshift, Lambda, containers, load balancing, availability zones
- IAM, CloudWatch, CloudFormation, Elastic Beanstalk, cloud compliance
- Glue transformations and Redshift warehousing

MODULE 06

Databricks & Delta Lake

The modern lakehouse stack interviews now assume.

- Workspace, clusters, notebooks, DBFS · interactive vs job clusters
- Connecting to external sources: S3, ADLS, GCS
- RDD vs DataFrame vs Dataset · transformations vs actions
- Delta tables, ACID transactions, schema enforcement & evolution, time travel
- Medallion architecture (Bronze → Silver → Gold), SCDs, error handling & retries

MODULE 07

Advanced Databricks & Orchestration

Production-grade pipelines, not notebooks.

- Autoloader (cloudFiles), CSV/JSON/Parquet ingestion, managed vs external tables
- Job scheduling, alerts & retries, run history
- MERGE/UPSERTs, OPTIMIZE & Z-ORDER, VACUUM & data retention
- Streaming: triggers, checkpointing, watermarks, stateful aggregations
- Partitioning, bucketing, caching & persisting
- Multi-task DAGs, Airflow/ADF integration, parameterized pipelines
- Unity Catalog RBAC, auditing & lineage, Delta Sharing, Delta Live Tables

MODULE 08

Microsoft Azure Data Engineering

The second cloud that doubles your job-market surface area.

- IaaS/PaaS/SaaS, regions, availability zones, resource groups, Azure AD & RBAC
- VMs, App Services, Functions · Blob, ADLS Gen2, File Storage
- Azure SQL, Cosmos DB, Synapse (dedicated vs serverless SQL pools)
- Azure Data Factory: Copy Data tool, integration runtime, advanced pipelines
- Azure Databricks, HDInsight, batch vs streaming architectures
- Purview governance & lineage, App Insights monitoring, cost management

MODULE 09

Interview Engineering

The module no other institute has — because no one else monitors 50 interviews a day.

- Live question bank from monitored interviews, refreshed monthly
- Weekly technical + HR mock interviews, AI-analysed
- Communication & confidence coaching — scored, not optional
- Readiness decided on your mock data, not on a sales target

Tools & technologies you'll work with

Python

SQL

Pandas

PySpark

Apache Spark

AWS (S3, Glue, Redshift, Lambda, EC2)

Databricks

Delta Lake

Azure (ADF, Synapse, ADLS Gen2)

Airflow

Kafka

Git

Real projects you'll build. These go on your CV.

Not toy exercises — industry-grade work you deliver, deploy and can walk an interviewer through line by line. Fully genuine, so every candidate clears background verification.

PROJECT 01

End-to-end batch pipeline

Raw data on S3 → Glue transformations → Redshift warehouse → live BI dashboard.

- Ingest from multiple sources
- Transform & cleanse at scale
- Load into a cloud warehouse
- Ship a live dashboard

PROJECT 02

Real-time clickstream pipeline

Kafka ingestion with Spark streaming, processed to analytics-ready tables.

- Producers & consumers
- Structured streaming
- Checkpointing & watermarks
- Delta sink

PROJECT 03

Medallion lakehouse on Databricks

Bronze → Silver → Gold with Delta Lake, SCDs and full data quality handling.

- Autoloader ingestion
- ACID Delta tables
- Slowly changing dimensions
- Time travel & audit

PROJECT 04

Production Airflow deployment

Orchestrated, monitored, alerting-enabled workflows — deployed, not just coded.

- DAG design & dependencies
- Retries & SLAs
- Alerting
- Parameterized runs

The placement engine.

You don't apply into a black hole.

You get presented — through three channels, by our team, with your profile optimised first.

01 · NAUKRI, DONE RIGHT

Profile built by our team

Your CV professionally optimised and loaded on Naukri by our team — not left to you.

02 · 3,000+ HR NETWORK

Broadcast to recruiters

Your profile shared across our network of recruiters and HR professionals actively hiring.

03 · DIRECT CLIENTS

Straight to hiring companies

Shared directly with our client companies hiring for Data Engineering roles right now.

Career services included

SERVICE	WHAT YOU GET
ATS Resume Building	A resume that survives the filter and gets read by a human
LinkedIn & GitHub	Profile optimised for recruiter search; portfolio that showcases real work
Mock Interviews	Weekly technical + HR mocks, AI-analysed, with detailed feedback
Communication Training	A scored module — not an add-on. Delivery is what converts skill into offers
Interview Question Bank	Live bank drawn from monitored interviews for this role, this month
1:1 Mentoring	Personalised guidance at every step until you're hired

Readiness is decided on data. We send you to interviews when your mock scores say you're ready — not when a sales target says so. That is precisely why our attend-to-place rate is what it is.

Fees that bet on you. Most of it only after you're placed.

YOUR PATH — EVERYTHING IS FREE UNTIL STEP 4

FREE • 01

Counselling + Career Report

Your honest strengths, gaps and live market fit — a written report, yours to keep either way.

FREE • 02

Live Masterclass

The market, the method, and placed students — live, with open Q&A.

FREE • 03

7-hour Python Bootcamp

Zero to working Python. Judge our teaching on substance, before paying a rupee.

STEP 04

Onboard — only if you love it

₹30,000 registration, agreement in writing, 30-day guarantee starts.

Registration (payable only after the free masterclass + bootcamp)

₹30,000

EMI option for registration

3 × ₹10,000

Placement fee — due only after you accept an offer

First 3 months' CTC

Paid as

6 monthly EMIs from your new salary

Your ₹30,000 registration

Adjusted inside the placement fee

EXAMPLE @ ₹12 LPA OFFER → 3 months' CTC = ₹3,00,000 – ₹30,000 already paid = ₹2,70,000 in 6 EMIs — paid from a salary you didn't have before. **We only earn properly when you do.**

30

30-day money-back guarantee. Any reason, or no reason — full refund in your first 30 days of the program. No questions asked. Written into your agreement.

Don't trust us. Verify us.

Every institute will tell you their course is the best. So don't decide on anyone's words — including ours. Here is exactly how to check the market yourself, tonight, in fifteen minutes, for free.

What we promise — in writing

- ✓ A syllabus rebuilt monthly from up to 50 real interviews monitored daily by our AI
- ✓ Interview readiness decided on your mock data — data points, not emotions
- ✓ 3-channel placement: Naukri optimisation, 3,000+ HR broadcast, direct clients
- ✓ 1 year unlimited live batches, upskilling & recordings — until you're hired
- ✓ Every call recorded & AI-monitored, so no one can promise what we won't honour

What we will never tell you

- ✗ **"Guaranteed job."** Nobody can guarantee employment — the market decides. Anyone who says yes is lying to you.
- ✗ **"We'll adjust your experience."** We never fabricate employment. Real projects, a real internship — that's why our candidates clear background verification.
- ✗ **"Fixed salary promise."** Packages depend on your profile, performance, and the live market.
- ✗ **"A shortcut."** Our numbers are real because our students attend, practice, and show up.

CHECK 01 • 5 MIN

Count the demand

Open Naukri → search "Data Engineer + your city" → filter "Last 7 days" → count the postings. If hiring is real, you'll see it in the number.

CHECK 02 • 5 MIN

Read 5 job descriptions

Note the skills that repeat. Then compare them against any institute's syllabus — ours included. A syllabus that doesn't match live JDs is preparing you for the wrong exam.

CHECK 03 • 5 MIN

Pressure-test everyone

Ask every institute: will you put every promise in writing? Is your success rate defined clearly? Do you guarantee a job? Compare the answers.

Questions to ask ANY institute — including us

- Will you put every promise — fees, refund, placement process — in a written agreement?
- Is your success rate defined clearly? **Ours: 98% of candidates who attend interviews, internal data.**
- Do you guarantee a job? **The only honest answer is no. Anyone who says yes is lying.**
- Will anything on my CV be fabricated? **With us: never — real projects and a real internship only.**

Real stories. Real people. Real success.

★★★★★

DevOps

"Big thanks to Trainer Krish for being such a motivating and knowledgeable guide. Your way of teaching with real-life examples made everything so easy to understand. You're not just a trainer, but a true mentor!"

KR Sampritha

★★★★★

Data Engineering

"The course is super well-structured, covering everything from ETL processes to data storage tools. Instead of just theory, I got to work on actual data pipelines and industry-relevant case studies."

Anish Lakumarapu

★★★★★

Data Engineering

"I would like to sincerely thank BrowseJobs for their incredible support in helping me find a job. Krish Sir, you are doing a wonderful job in helping students who dream of working in the IT industry."

Saket Vaibhav

★★★★★

DevOps

"I recommend BrowseJobs to anyone looking to advance their career in IT. The course was comprehensive, well-structured, and tailored. My tutor was always available to clear any doubts."
