

CAREER PROGRAM · PYTHON BACKEND

Python Backend

Production Python for the backend roles companies are hiring for — APIs, databases, and the engineering practices interviews test. A six-month, project-first program whose syllabus is rebuilt every month from real backend interviews.

50/day

Real interviews monitored by our AI

~90%

Of interview questions come from our material

98%

Of candidates who attend interviews get placed

1 year

Unlimited live batches & recordings

6 MONTHS · LIVE ONLINE · BENGALURU · 2026 EDITION

EVERY PROMISE IN WRITING · EVERY CALL RECORDED & AI-MONITORED.

Most institutes teach a syllabus. We prepare you for the interview.

The problem with every other course: fixed syllabi written years ago, packed with topics no interviewer asks about — while the questions that decide your offer change every quarter. You spend months studying, then walk into interviews prepared for the wrong exam.

THE SYLLABUS ENGINE — REBUILT MONTHLY

This syllabus was not written. It was reverse-engineered.

STEP 01 — LISTEN

Our Claude-based AI monitors up to 50 real & mock interviews every single day.

STEP 02 — EXTRACT

It collects the actual questions companies are asking for this role, this month.

STEP 03 — REBUILD

The syllabus is rebuilt around real demand — you study only what's actually asked.

50/day

Real interviews monitored by our AI

~90%

Of interview questions come from our material

98%

Of candidates who attend interviews get placed

1 year

Unlimited live batches & recordings

*Based on BrowseJobs internal data. Historical figures — not a promise of individual outcome. Hiring depends on the live market and your performance.

Why backend engineering stays the most portable skill in software

Every product needs an API, a database and someone who can keep both up. Backend is the least fashion-driven track we run, which is exactly why it stays hireable — and why adding AI features to a backend is now a standard part of the job.

CAREER GROWTH FLOW

Backend Developer

Build and maintain APIs against a real database

Software Engineer

Own a service end to end, including its deployment

Senior Backend Engineer

Design for scale, lead reviews, set the patterns

Tech Lead / Architect

System design across services and teams

Built for your situation. Judged on your outcomes.

SWITCHING DOMAINS?

The real, industry-grade projects you build here become the centerpiece of your CV — hands-on work in the new domain, fully genuine, fully BGV-safe.

CAREER GAP?

A structured internship with us, built around projects you actually deliver, fills your timeline with documented work. A gap is only a gap if it's empty.

FRESHER?

Earn a free internship certificate with BrowseJobs.ai — the equivalent of six months of hands-on experience before your first interview.

WHAT YOU'LL WALK OUT ABLE TO DO

- ✓ Design and ship production REST APIs with FastAPI, backed by a real database
- ✓ Model data properly in PostgreSQL — schemas, indexes, transactions and migrations
- ✓ Secure an API the way interviews expect: auth, authorization, validation and rate limits
- ✓ Run background work, caching and async I/O without breaking under load
- ✓ Answer the system-design and debugging questions backend interviews lead with

ROLES THIS PREPARES YOU FOR

Backend Developer

Python Developer

API Developer

Software Engineer

Platform Engineer

PROGRAM FORMAT

Duration	6 months
Format	Live online + recordings
Access	1 year unlimited
Projects	5 CV-ready

“We qualify you on data points, not emotions. Your mock-interview data decides when you're ready — and then the market meets you.”

— DR. KRISH BHARGAV, FOUNDER & MENTOR

The live syllabus. Rebuilt monthly from real interviews.

11 modules. Zero filler. Every topic below appeared in a monitored interview for this role — that is the only reason it is here.

MODULE 01

Python for Backend Engineering

Core Python through to the depth interviewers actually probe.

- Data types, collections, comprehensions, slicing
- Functions, arguments, closures, decorators
- Classes, inheritance, dunder methods, dataclasses
- Modules, packaging, virtual environments, dependency management
- Exceptions, context managers, file and JSON handling
- Type hints and static checking

MODULE 02

Clean Code & Testing

The round that separates a scripter from an engineer.

- SOLID principles applied to real Python
- pytest: fixtures, parametrize, mocking, coverage
- Test-driven development on a real feature
- Debugging, logging and profiling
- Git workflow: branches, pull requests, code review

MODULE 03

Databases & SQL

Backend interviews are database interviews wearing a different hat.

- PostgreSQL fundamentals, data types, constraints
- Joins, aggregations, subqueries, window functions
- Schema design, normalization, indexing strategy
- Transactions, isolation levels, deadlocks
- SQLAlchemy ORM, sessions, relationships, N+1 queries
- Alembic migrations and safe schema change

MODULE 04

FastAPI & Production APIs

The framework named in most current Python backend job descriptions.

- Routing, path & query parameters, dependency injection
- Pydantic models, request/response validation, serialization
- REST design, status codes, versioning, pagination
- Error handling and a consistent error envelope
- OpenAPI docs, and testing endpoints with httpx

MODULE 05

Authentication, Authorization & Security

The area candidates most often get caught out on.

- Password hashing, sessions vs tokens, JWT and refresh flows
- OAuth2 and third-party login
- Role-based access control and permission design
- OWASP Top 10 for APIs: injection, IDOR, SSRF, mass assignment
- Secrets management, CORS, rate limiting

MODULE 06

Async Python, Queues & Background Jobs

Where 'it worked on my laptop' stops being good enough.

- asyncio, coroutines, event loop, async database access
- Blocking vs non-blocking I/O — and how to tell which you wrote
- Celery and Redis: queues, workers, retries, idempotency
- Scheduled jobs and long-running task patterns
- WebSockets and server-sent events

MODULE 07

Caching, Performance & Scale

The system-design conversation, made concrete.

- Redis caching patterns, TTLs, cache invalidation
- Query optimization and connection pooling
- Load testing and finding the real bottleneck
- Horizontal scaling, statelessness, load balancing
- Observability: structured logs, metrics, tracing

MODULE 08

Docker, CI/CD & Cloud Deployment

Shipping it — because a project that isn't deployed doesn't count.

- Dockerfiles, multi-stage builds, Docker Compose
- GitHub Actions: test, build and deploy pipelines
- Environment configuration and twelve-factor practice
- Deploying to AWS: EC2, RDS, S3, load balancing
- Zero-downtime deploys, health checks and rollback

MODULE 09

System Design for Backend Interviews

The round that decides your level — and your offer.

- Requirements, estimation and trade-off reasoning
- Designing a URL shortener, a rate limiter, a feed
- SQL vs NoSQL, sharding, replication, consistency
- Message queues and event-driven architecture
- Microservices vs monolith — and defending your choice

MODULE 10

Agentic AI for Backend Engineers

Backend roles now ship AI features — this is the part interviews ask about.

- Calling LLM APIs from a backend: streaming, timeouts, retries, idempotency
- Structured outputs with Pydantic and schema-validated tool calling
- Building an MCP server that exposes your own API to an agent
- RAG service design: embeddings, a vector store, and citation-backed answers
- Guardrails, prompt-injection defence and least-privilege tool access
- Token cost, caching and rate limiting for AI endpoints
- Evaluating and monitoring a non-deterministic feature in production

MODULE 11

Interview Engineering

The module no other institute has — because no one else monitors 50 interviews a day.

- Live question bank from monitored interviews, refreshed monthly
- Weekly technical + HR mock interviews, AI-analysed
- Live coding and debugging drills under time pressure
- Communication & confidence coaching — scored, not optional

Real projects you'll build. These go on your CV.

Not toy exercises — industry-grade work you deliver, deploy and can walk an interviewer through line by line. Fully genuine, so every candidate clears background verification.

PROJECT 01

Production REST API

A multi-resource API with auth, validation, pagination and a full test suite.

FastAPI + PostgreSQL

JWT auth & RBAC

Migrations

90%+ test coverage

PROJECT 02

Async job processing service

Queue-backed background work with retries, idempotency and monitoring.

Celery + Redis

Retry & dead-letter

Scheduled jobs

Worker metrics

PROJECT 03

Containerised deployment pipeline

Commit to running service on AWS, automatically, with rollback.

Multi-stage Docker

GitHub Actions CI/CD

Deploy to AWS

Health checks

PROJECT 04

High-throughput cached service

An endpoint taken from slow to fast, with the load test that proves it.

Redis caching

Query optimization

Load testing

Before/after benchmarks

PROJECT 05

AI feature on your own API

An MCP server over your service plus a guardrailed, cited RAG endpoint.

MCP server

Vector store & RAG

Structured outputs

Cost & rate limits

Your projects don't stop at the notebook.

Every CV-ready project in this program is deployed, not just coded. An interviewer can open it, and you can walk them through the pipeline that put it there — which is exactly the conversation that converts a project into an offer.

01

Your own cloud account

You build in a real AWS or Azure account with real IAM, real billing alarms and real limits — not a simulator.

02

Version-controlled from day one

Git and GitHub from the first commit, with branches, pull requests and review — the workflow your first team will expect.

03

Automated build & deploy

A pipeline takes each project from commit to running environment, so deployment is a repeatable step rather than a one-off.

04

Monitored and demoable

Dashboards, logs and alerts on top, plus a written architecture walkthrough you rehearse in mock interviews.

THE STACK YOU'LL HAVE USED

Python

FastAPI

PostgreSQL

SQLAlchemy

Alembic

Redis

Celery

pytest

Docker

GitHub Actions

AWS

Git

MCP

Everything included. The whole machine, from day one.

No add-on pricing for the things that get you hired. Every tool below ships with this track.

LEARN

PROVE

GET HIRED

AI Tutor — awake at 2am

Every doubt answered in seconds, in your context, from your syllabus. Students ask it hundreds of questions a course, because it never judges and never sleeps.

Live batches + recordings

Every class is live and instructor-led, then recorded and searchable by topic. Your access runs a full year, so a missed class is never a lost one.

Coding Lab

Browser-based labs with the real stack. You write, run and break things inside the LMS — no local setup standing between you and practice.

Content Hub & lesson notes

Per-lesson notes, slides and reference material, generated against the day's teaching plan and kept with the recording.

Voice Mock Lab — the interviewer that calls you

A voice AI rings your phone, runs a real technical round, and scores every answer on depth, communication and confidence. By the twelfth mock, the real thing feels like a rerun.

Weekly technical + HR mocks

Human-led mocks alongside the AI ones, AI-analysed afterwards, each returning a written gap report rather than a grade.

PRI & the mastery map

A Placement Readiness Index built from your mock data, attendance and assignments — with one clear next best action every day.

Live interview question bank

The questions pulled from monitored interviews for your role this month, organised round by round.

Quizzes, assignments & graded feedback

Scored work with trainer feedback, so readiness is a measurement rather than an opinion.

Job Radar

Live roles from LinkedIn and Naukri matched to your skill graph and refreshed daily, so the openings are already waiting when you are ready.

ATS resume, LinkedIn & GitHub

Your CV rebuilt to survive the filter, your LinkedIn tuned for recruiter search, your GitHub arranged around the projects you actually shipped.

Verifiable certificates

Every certificate carries a QR code that resolves to a public verification page. An employer checks it in one scan.

1:1 mentoring & support desk

A mentor for the career decisions and a ticketed support desk for everything else, both inside the LMS.

The placement engine. You don't apply into a black hole.

You get presented — through three channels, by our team, with your profile optimised first.

01 · NAUKRI, DONE RIGHT

Profile built by our team

Your CV professionally optimised and loaded on Naukri by our team — not left to you.

02 · 3,000+ HR NETWORK

Broadcast to recruiters

Your profile shared across our network of recruiters and HR professionals actively hiring.

03 · DIRECT CLIENTS

Straight to hiring companies

Shared directly with our client companies hiring for this role right now.

CAREER SERVICES INCLUDED

SERVICE

WHAT YOU GET

ATS Resume Building

A resume that survives the filter and gets read by a human

LinkedIn & GitHub

Profile optimised for recruiter search; portfolio that showcases real work

Mock Interviews

Weekly technical + HR mocks, AI-analysed, with detailed feedback

Communication Training

A scored module — not an add-on. Delivery is what converts skill into offers

Interview Question Bank

Live bank drawn from monitored interviews for this role, this month

1:1 Mentoring

Personalised guidance at every step until you're hired

READINESS IS DECIDED ON DATA

We send you to interviews when your mock scores say you're ready — not when a sales target says so. That is precisely why our attend-to-place rate is what it is.

Fees that bet on you. Most of it only after you're placed.

YOUR PATH — EVERYTHING IS FREE UNTIL STEP 04

FREE • 01

Free counselling + written Career Analysis Report

Talk to us. You leave with a written report on where you stand and what to do — whether you join or not.

FREE • 02

Free live Masterclass

See the method live. How the syllabus is reverse-engineered from real interviews, and what you'd actually study.

FREE • 03

Free 7-hour Python Bootcamp

Sit a real teaching day before you decide. Seven hours of live Python — no card, no commitment.

STEP 04

Registration — ₹30,000

Only after all three free steps. EMI available: 3 × ₹10,000. Then full enrolment and LMS access.

Registration (payable only after the free masterclass + bootcamp)

₹30,000

EMI option for registration

3 × ₹10,000

Placement fee — due only after you accept an offer

First 3 months' CTC

Paid as

6 monthly EMIs from your new salary

Your ₹30,000 registration

Adjusted inside the placement fee

WORKED EXAMPLE • ₹12 LPA OFFER

3 months' CTC = ₹3,00,000 — ₹30,000 already paid = ₹2,70,000 in 6 EMIs — paid from a salary you didn't have before. We only earn properly when you do.

30-day money-back guarantee

Any reason, or no reason — full refund in your first 30 days of the program. No questions asked. Written into your agreement.

Don't trust us. Verify us.

Every institute will tell you their course is the best. So don't decide on anyone's words — including ours. Here is exactly how to check the market yourself, tonight, in fifteen minutes, for free.

CHECK 01 · 5 MIN

Count the demand

Open Naukri → search the role + your city → filter “Last 7 days” → count the postings. If hiring is real, you'll see it in the number.

CHECK 02 · 5 MIN

Read 5 job descriptions

Note the skills that repeat. Then compare them against any institute's syllabus — ours included. A syllabus that doesn't match live JDs is preparing you for the wrong exam.

CHECK 03 · 5 MIN

Pressure-test everyone

Ask every institute: will you put every promise in writing? Is your success rate defined clearly? Do you guarantee a job? Compare the answers.

What we promise — in writing

- ✓ Every commitment you get from us is in writing.
- ✓ Three full steps are free before you pay a rupee.
- ✓ The placement fee is due only after you accept an offer.
- ✓ 30-day money-back guarantee — any reason, full refund.
- ✓ Every counselling call is recorded & AI-monitored.

What we will never tell you

- ✗ “We guarantee you a job.” Nobody honestly can — the market decides.
- ✗ “We'll adjust your experience.” We never fabricate employment.
- ✗ A fixed salary promise.
- ✗ That hiring is certain, or that there's a shortcut.

QUESTIONS TO ASK ANY INSTITUTE — INCLUDING US

- Will you put every promise — fees, refund, placement process — in a written agreement?
- Is your success rate defined clearly? Ours: 98% of candidates who attend interviews, internal data.
- Do you guarantee a job? The only honest answer is no.
- Will anything on my CV be fabricated? With us: never — real projects and a real internship only.

Real stories. Real people. Real success.

★★★★★ DEVOPS

"Big thanks to Trainer Krish for being such a motivating and knowledgeable guide. Your way of teaching with real-life examples made everything so easy to understand. You're not just a trainer, but a true mentor!"

KR Sampritha

★★★★★ DATA ENGINEERING

"The course is super well-structured, covering everything from ETL processes to data storage tools. Instead of just theory, I got to work on actual data pipelines and industry-relevant case studies."

Anish Lakumarapu

★★★★★ DATA ENGINEERING

"I would like to sincerely thank BrowseJobs for their incredible support in helping me find a job. Krish Sir, you are doing a wonderful job in helping students who dream of working in the IT industry."

Saket Vaibhav

★★★★★ DEVOPS

"I recommend BrowseJobs to anyone looking to advance their career in IT. The course was comprehensive, well-structured, and tailored. My tutor was always available to clear any doubts."
