Real interviews monitored by our AI

1 year

Unlimited live batches & recordings

*Based on BrowseJobs internal data. Historical figures – not a promise of individual outcome. Hiring depends on the live market and your performance.

THE SYLLABUS ENGINE – REBUILT MONTHLY

This syllabus was not written. It was reverse-engineered.

1

LISTEN

Our Claude-based AI monitors up to 50 real & mock interviews every single day.

2

EXTRACT

It collects the actual questions companies are asking for this role, this month.

3

REBUILD

The syllabus is rebuilt around real demand — you study only what's actually asked.

Colleges hand you a degree. Nobody hands you a career. So we built a machine.

Studies

~50 real interview transcripts, every day

Teaches

exactly what companies ask right now

Drills

you until pressure feels normal

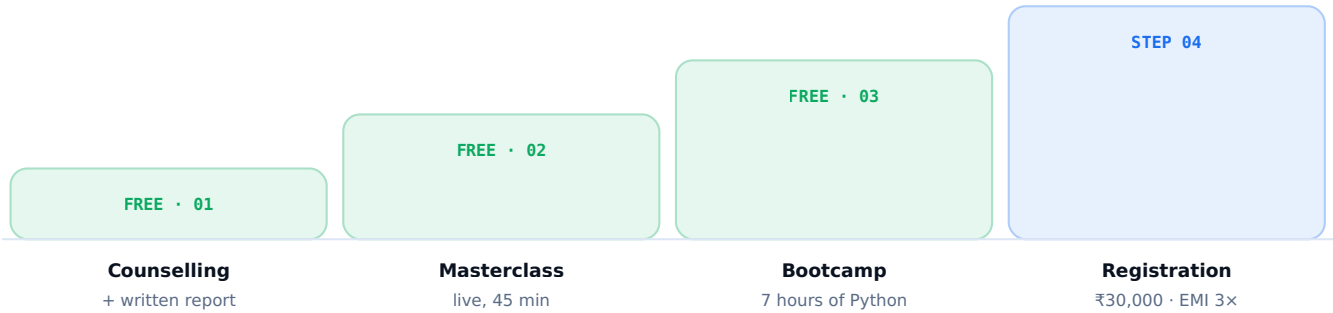

Hunts

jobs with you until you sign an offer

THREE FREE STEPS BEFORE YOU PAY A RUPEE

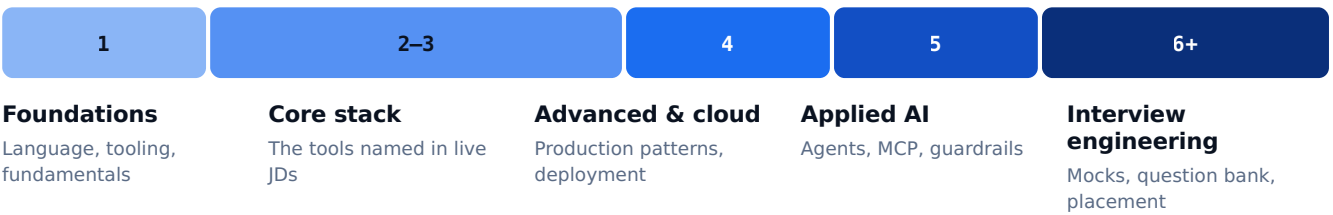

Everything between where you are and the offer letter.

THE PATH

You judge the teaching before you pay for it. The 30-day money-back guarantee starts at step 04 — any reason, full refund, written into your agreement.

SIX MONTHS, MONTH BY MONTH

Access runs a full year — longer than the programme itself, so you can sit any later batch again at no cost.

One fee. The whole machine.

No add-on pricing for the things that get you hired.

LEARN

AI Tutor — awake at 2am

Every doubt answered in seconds, from your syllabus.

Live batches + recordings

Live, instructor-led, recorded and searchable for a year.

Coding Lab

Browser labs on the real stack. No local setup.

Content Hub & lesson notes

Notes, slides and reference material per lesson.

PROVE

Voice Mock Lab — the interviewer that calls you

A voice AI rings your phone and scores the round.

Weekly technical + HR mocks

Human-led mocks, AI-analysed, with a written gap report.

PRI & the mastery map

A readiness index and one next best action, daily.

Live interview question bank

This month's questions for your role, round by round.

Quizzes, assignments & graded feedback

Scored work with trainer feedback.

GET HIRED

Job Radar

LinkedIn and Naukri roles matched to you, daily.

ATS resume, LinkedIn & GitHub

Rebuilt to survive the filter and the recruiter search.

Verifiable certificates

A QR an employer scans to check you.

1:1 mentoring & support desk

A mentor for decisions, a ticket desk for everything else.

WHATEVER YOU'RE STARTING FROM

SWITCHING DOMAINS?

The real, industry-grade projects you build here become the centerpiece of your CV — hands-on work in the new domain, fully genuine, fully BGV-safe.

CAREER GAP?

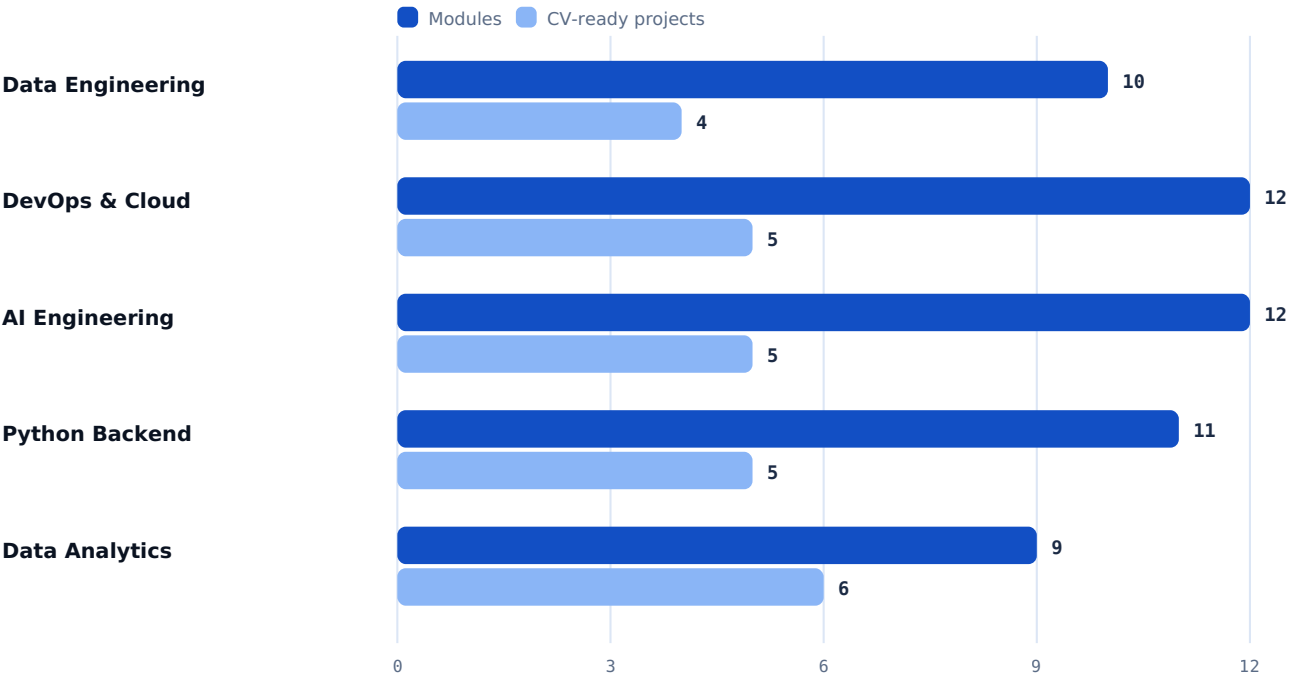

A structured internship with us, built around projects you actually deliver, fills your timeline with documented work. A gap is only a gap if it's empty.

FRESHER?

Earn a free internship certificate with BrowseJobs.ai — the equivalent of six months of hands-on experience before your first interview.

Five live tracks. Every one rebuilt monthly.

WHAT EACH TRACK CONTAINS

Every track now carries an applied agentic-AI module and an AI project you can walk an interviewer through.

DE

Data Engineering

Python · SQL · Pandas · PySpark

DC

DevOps & Cloud

Linux · Bash · Git · GitHub

AE

AI Engineering

Python · OpenAI API · Anthropic API · Ollama

PB

Python Backend

Python · FastAPI · PostgreSQL · SQLAlchemy

DA

Microsoft Excel · SQL · Python · NumPy

EVERY TRACK, THE SAME SPINE – live instructor-led classes with recordings · 1 year unlimited access · CV-ready projects you deploy · weekly AI-analysed mocks · a question bank rebuilt monthly · placement support until you accept an offer.

OPENING NEXT Cyber Security · ServiceNow — register to be told when a batch opens.

We only run tracks where hiring is real.

SALARY GROWTH LADDER · INDIAN MARKET RANGES

Salary ranges are market observations, not a promise. Packages depend on your profile, performance and the live market — verify current ranges yourself on Naukri (see Check 01).

WHY DATA ENGINEERING LEADS THE DEMAND

1.1M

global job postings for Data Engineers (2024)

50%

CAGR in the global data industry

400K

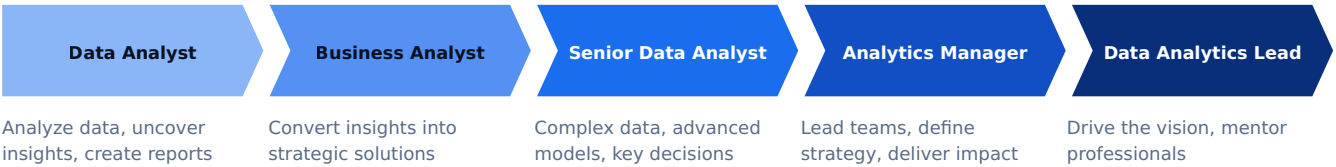

demand-supply gap in India & the US

55%

average salary hike for our graduates*

Market figures are industry estimates from public sources. Salary-hike figure is BrowseJobs internal data — not a promise of individual outcome.

CAREER GROWTH FLOW · DATA ANALYTICS

The ladder runs long — analysts move into strategy and leadership rather than topping out.

Two fees. Both in writing. One only after you're hired.

WHAT YOU PAY, AND WHEN

10%

90%

● Before you're hired

₹30,000 registration

● Only after you accept an offer

₹2,70,000 · 6 EMIs from your new salary

Worked example on a ₹12 LPA offer. The placement fee is your first 3 months' CTC with the registration adjusted inside it, so most of what you pay comes out of a salary you did not have before.

Promised in writing

- ✓ Every commitment you get from us is in writing.
- ✓ Three full steps are free before you pay a rupee.
- ✓ The placement fee is due only after you accept an offer.
- ✓ 30-day money-back guarantee — any reason, full refund.
- ✓ Every counselling call is recorded & AI-monitored.

Never said here

- ✗ "We guarantee you a job." Nobody honestly can — the market decides.
- ✗ "We'll adjust your experience." We never fabricate employment.
- ✗ A fixed salary promise.
- ✗ That hiring is certain, or that there's a shortcut.

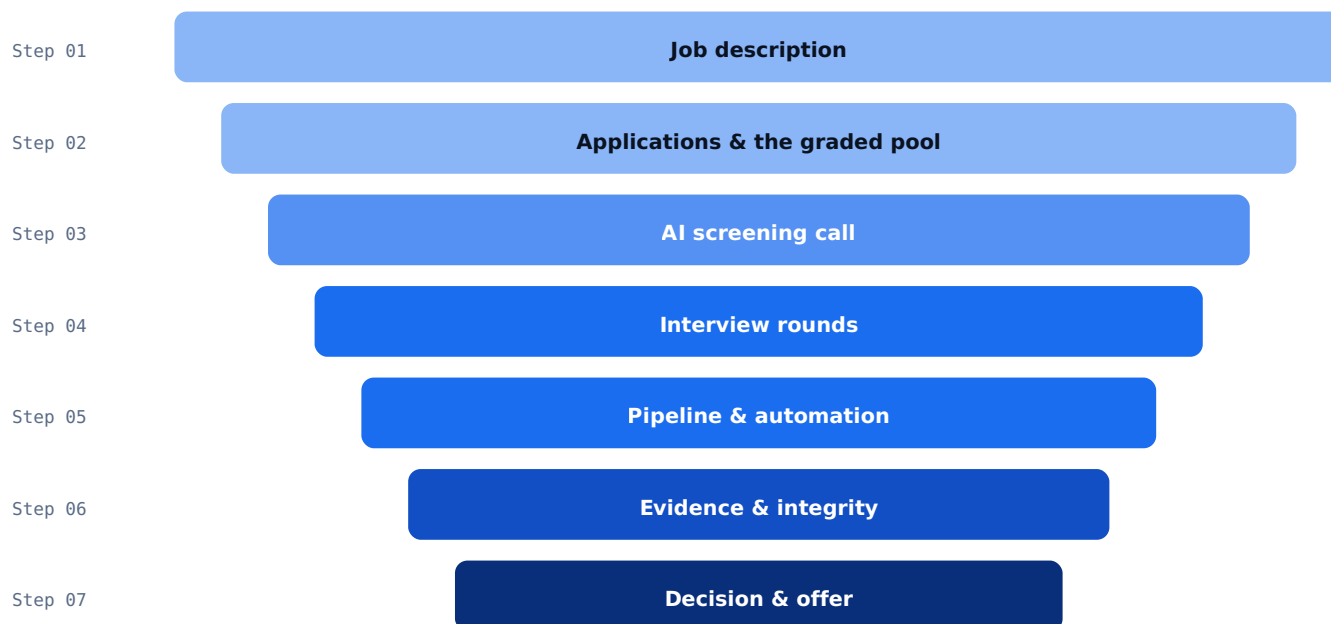

30

Day money-back guarantee

Any reason, or no reason — a full refund in your first 30 days of the programme. No forms designed to make you give up. Written into your agreement.

Interview the shortlist. Not the inbox.

THE HIRING PIPELINE, END TO END

Automation can advance, unlock or nudge — it can never reject terminally, and it never releases an offer. Both take an explicit human action.

Before

- ✗ Post the role, wait for the inbox to fill
- ✗ Recruiter reads hundreds of CVs by hand
- ✗ Chase candidates for notice period and CTC
- ✗ Half the L1 slots are no-shows or mismatches
- ✗ You meet the candidate before you have any evidence

With BrowseJobs

- ✓ JD in, structured role out — same sitting
- ✓ Ranked shortlist, each rank explained in writing
- ✓ AI screening call confirms the basics first
- ✓ L1/L2 run only on candidates who cleared the screen
- ✓ Replays, transcripts and scores waiting before your first meeting

Illustrative example of the process, not a performance claim. Actual volumes, timelines and outcomes depend on your role, your market and your selection bar.

Two ways to work with us.

YOUR OWN APPLICANTS

Run your own pipeline

- Your workspace, your JDs, your roles and permissions
- Inbound applicants graded and ranked against your bar
- Invite anyone already in your hands to take the JD's mock
- Optional CRM layer, configured to your hiring model

OUR CANDIDATE POOL

Run it as an agency engagement

- Sourcing from the BrowseJobs graded candidate pool
- We operate JD, shortlist, screening and rounds
- You receive the graded report per finalist
- Scales up and down with your open roles

WHAT IT COSTS

First 6 months — full pipeline, no card, no lock-in

Free

Agency model

8% of CTC

Per interview

Shared on the call

Nothing is charged without a written agreement first.

ON THE ROADMAP — NOT AVAILABLE YET

- **Run it on your own stack** — A public employer API, HMAC-signed webhooks and CSV/ATS import, so the pipeline reads and writes against the systems you already have.
- **Full background verification** — A Trust Score built from DigiLocker ID, PAN, education certificates and EPFO employment history — with each component and its status shown, never a black box.
- **Semantic candidate search** — Describe the person in a sentence and get matches back, with the interpretation shown as chips you can remove. Saved searches and match alerts alongside.

The people who did it, on the record.

★★★★★ DEVOPS

“Big thanks to Trainer Krish for being such a motivating and knowledgeable guide. Your way of teaching with real-life examples made everything so easy to understand. You're not just a trainer, but a true mentor!”

KR Sampritha

★★★★★ DATA ENGINEERING

“The course is super well-structured, covering everything from ETL processes to data storage tools. Instead of just theory, I got to work on actual data pipelines and industry-relevant case studies.”

Anish Lakumarapu

★★★★★ DATA ENGINEERING

“I would like to sincerely thank BrowseJobs for their incredible support in helping me find a job. Krish Sir, you are doing a wonderful job in helping students who dream of working in the IT industry.”

Saket Vaibhav

★★★★★ DEVOPS

“I recommend BrowseJobs to anyone looking to advance their career in IT. The course was comprehensive, well-structured, and tailored. My tutor was always available to clear any doubts.”
