

CAREER PROGRAM · DEVOPS & CLOUD

DevOps & Cloud

Own the pipeline from commit to production. A six-month, hands-on program whose syllabus is rebuilt every month from real DevOps interview questions — build, automate, deploy, monitor.

50/day

Real interviews monitored by our AI

~90%

Of interview questions come from our material

98%

Of candidates who attend interviews get placed

1 year

Unlimited live batches & recordings

6 MONTHS · LIVE ONLINE · BENGALURU · 2026 EDITION

EVERY PROMISE IN WRITING · EVERY CALL RECORDED & AI-MONITORED.

Most institutes teach a syllabus. We prepare you for the interview.

The problem with every other course: fixed syllabi written years ago, packed with topics no interviewer asks about — while the questions that decide your offer change every quarter. You spend months studying, then walk into interviews prepared for the wrong exam.

THE SYLLABUS ENGINE — REBUILT MONTHLY

This syllabus was not written. It was reverse-engineered.

STEP 01 — LISTEN

Our Claude-based AI monitors up to 50 real & mock interviews every single day.

STEP 02 — EXTRACT

It collects the actual questions companies are asking for this role, this month.

STEP 03 — REBUILD

The syllabus is rebuilt around real demand — you study only what's actually asked.

50/day

Real interviews monitored by our AI

~90%

Of interview questions come from our material

98%

Of candidates who attend interviews get placed

1 year

Unlimited live batches & recordings

*Based on BrowseJobs internal data. Historical figures — not a promise of individual outcome. Hiring depends on the live market and your performance.

Why DevOps is one of the highest-paying careers in tech

DevOps skills are among the most in-demand in the industry — and the salary ladder reflects it. Automation-first, cloud-native, remote-friendly, with faster promotion cycles than almost any other engineering track.

SALARY GROWTH LADDER • INDIAN MARKET RANGES

Freshers	₹6 — 8
Junior DevOps Engineer	₹8 — 12
DevOps Engineer	₹12 — 18
Senior DevOps Engineer	₹18 — 22
Cloud Architect	₹20 — 25+

Salary ranges are market observations, not a promise. Packages depend on your profile, performance and the live market — verify current ranges yourself on Naukri (see Check 01).

Built for your situation. Judged on your outcomes.

SWITCHING DOMAINS?

The real, industry-grade projects you build here become the centerpiece of your CV — hands-on work in the new domain, fully genuine, fully BGV-safe.

CAREER GAP?

A structured internship with us, built around projects you actually deliver, fills your timeline with documented work. A gap is only a gap if it's empty.

FRESHER?

Earn a free internship certificate with BrowseJobs.ai — the equivalent of six months of hands-on experience before your first interview.

WHAT YOU'LL WALK OUT ABLE TO DO

- ✓ Build and run CI/CD pipelines that take code from commit to production automatically
- ✓ Deploy, scale and troubleshoot containerized applications on Kubernetes
- ✓ Provision real cloud infrastructure with Terraform — and defend every choice in an interview
- ✓ Monitor and alert like an SRE, with Prometheus and Grafana dashboards you built
- ✓ Handle the scenario-based questions DevOps interviews now lead with

ROLES THIS PREPARES YOU FOR

DevOps Engineer

Site Reliability Engineer

Cloud Engineer

Platform Engineer

Build & Release Engineer

PROGRAM FORMAT

Duration	6 months
Format	Live online + recordings
Access	1 year unlimited
Projects	5 CV-ready

“We qualify you on data points, not emotions. Your mock-interview data decides when you're ready — and then the market meets you.”

— DR. KRISH BHARGAV, FOUNDER & MENTOR

The live syllabus. Rebuilt monthly from real interviews.

12 modules. Zero filler. Every topic below appeared in a monitored interview for this role — that is the only reason it is here.

MODULE 01

DevOps Fundamentals

The framing every interview opens with.

- SDLC and the DevOps lifecycle
- Agile & Scrum basics
- CI vs CD — and why interviewers test the distinction
- IaC overview, benefits of DevOps

MODULE 02

Linux & Shell Scripting

The round every DevOps interview starts with.

- Linux basics, file system hierarchy, essential commands
- User management, permissions, process management
- Bash automation and scripting
- Networking fundamentals

MODULE 03

Git & GitHub

Version control the way teams actually use it.

- Git basics, branching strategies
- Merge & rebase
- Remote repositories, GitHub workflow
- Pull requests and code review

MODULE 04

Docker & Containerization

Containers, properly — not just “docker run”.

- Images and layers
- Containers: run, manage, interact
- Dockerfile & multi-stage builds
- Docker Compose for multi-container apps
- Docker Hub & registries

MODULE 05

Kubernetes

Where most DevOps candidates fail — and where we spend the most time.

- Pods — the smallest deployable units
- Deployments, updates and rollbacks
- Services & Ingress: exposing applications
- ReplicaSets and autoscaling
- Helm charts
- Real troubleshooting scenarios

MODULE 06

Terraform — Infrastructure as Code

Provision real cloud infrastructure, reproducibly.

- Providers: interacting with cloud platforms
- Modules: reusable infrastructure components
- Variables for dynamic configuration
- State file management and remote state

MODULE 07

Ansible

Configuration management and automation at scale.

- Inventory: defining and managing hosts
- Roles: organizing reusable tasks
- Playbooks: automating configuration with YAML

MODULE 08

Jenkins & CI/CD Pipelines

Pipeline-as-code, the way production teams run it.

- Pipeline: automate build, test and deploy workflows
- Pipeline as Code with Jenkinsfile
- Agents: distributing jobs for scalability
- GitHub Actions fundamentals

MODULE 09

AWS for DevOps

The cloud layer under everything above.

- IAM — manage access securely
 - EC2, VPC, ELB, Auto Scaling
 - Route53 DNS routing, S3 object storage
 - ECR container registry, Amazon RDS
 - Multi-AZ architecture and high availability
-

MODULE 10

Monitoring, Observability & SRE

What separates a DevOps engineer from a script-runner.

- Prometheus: metrics collection
- Grafana: dashboards and visualization
- Alerting and on-call fundamentals
- SRE principles: SLOs, error budgets

MODULE 11

Agentic AI for DevOps

AIOps has stopped being a buzzword — this is the part interviews now ask platform engineers about.

- Agent fundamentals for platform teams: tool calling, the agent loop, structured outputs
- MCP servers over cloud APIs, Kubernetes and your CI/CD system
- Incident-response agents: log triage, root-cause summaries, runbook execution
- Human-in-the-loop approval gates — why an agent never gets `kubectl delete`
- AI in the pipeline: PR review, IaC drift explanation, test-failure triage
- Self-healing infrastructure — and the failure modes that argue against it
- Securing agents: least privilege, secret handling, prompt injection through logs
- Observability for agents: tracing, token cost, and SLOs on non-deterministic systems

MODULE 12

Interview Engineering

The module no other institute has — because no one else monitors 50 interviews a day.

- Live question bank from monitored interviews, refreshed monthly
- Weekly technical + HR mock interviews, AI-analysed
- Scenario-based troubleshooting drills
- Communication & confidence coaching — scored, not optional

Real projects you'll build. These go on your CV.

Not toy exercises — industry-grade work you deliver, deploy and can walk an interviewer through line by line. Fully genuine, so every candidate clears background verification.

PROJECT 01

Full CI/CD pipeline

A three-tier application taken from commit to automated production deployment with Jenkins.

Code commit triggers

Automated build

Automated testing

Deploy to AWS

PROJECT 02

Docker deployment

Containerize real applications and ship them.

Create Docker images

Docker Compose

Push to Docker Hub

Run multi-container apps

PROJECT 03

Terraform infrastructure

A complete cloud environment provisioned end-to-end as code.

Write Terraform code

Create AWS resources

Manage state

Full infrastructure automation

PROJECT 04

Microservices on Kubernetes

Deployed, autoscaled and monitored with Prometheus and Grafana.

Pods & deployments

Services & Ingress

ConfigMaps & secrets

Rolling updates

PROJECT 05

Incident-response agent

An agent wired to your cluster over MCP that triages an alert, summarises root cause and proposes a runbook step.

MCP over Kubernetes & logs

Alert triage

Approval before any write

Traced & cost-capped

THE STACK YOU'LL HAVE USED

Your projects don't stop at the notebook.

Every CV-ready project in this program is deployed, not just coded. An interviewer can open it, and you can walk them through the pipeline that put it there — which is exactly the conversation that converts a project into an offer.

01

Your own cloud account

You build in a real AWS or Azure account with real IAM, real billing alarms and real limits — not a simulator.

02

Version-controlled from day one

Git and GitHub from the first commit, with branches, pull requests and review — the workflow your first team will expect.

03

Automated build & deploy

A pipeline takes each project from commit to running environment, so deployment is a repeatable step rather than a one-off.

04

Monitored and demoable

Dashboards, logs and alerts on top, plus a written architecture walkthrough you rehearse in mock interviews.

Everything included. The whole machine, from day one.

No add-on pricing for the things that get you hired. Every tool below ships with this track.

LEARN

PROVE

GET HIRED

AI Tutor — awake at 2am

Every doubt answered in seconds, in your context, from your syllabus. Students ask it hundreds of questions a course, because it never judges and never sleeps.

Live batches + recordings

Every class is live and instructor-led, then recorded and searchable by topic. Your access runs a full year, so a missed class is never a lost one.

Coding Lab

Browser-based labs with the real stack. You write, run and break things inside the LMS — no local setup standing between you and practice.

Content Hub & lesson notes

Per-lesson notes, slides and reference material, generated against the day's teaching plan and kept with the recording.

Voice Mock Lab — the interviewer that calls you

A voice AI rings your phone, runs a real technical round, and scores every answer on depth, communication and confidence. By the twelfth mock, the real thing feels like a rerun.

Weekly technical + HR mocks

Human-led mocks alongside the AI ones, AI-analysed afterwards, each returning a written gap report rather than a grade.

PRI & the mastery map

A Placement Readiness Index built from your mock data, attendance and assignments — with one clear next best action every day.

Live interview question bank

The questions pulled from monitored interviews for your role this month, organised round by round.

Quizzes, assignments & graded feedback

Scored work with trainer feedback, so readiness is a measurement rather than an opinion.

Job Radar

Live roles from LinkedIn and Naukri matched to your skill graph and refreshed daily, so the openings are already waiting when you are ready.

ATS resume, LinkedIn & GitHub

Your CV rebuilt to survive the filter, your LinkedIn tuned for recruiter search, your GitHub arranged around the projects you actually shipped.

Verifiable certificates

Every certificate carries a QR code that resolves to a public verification page. An employer checks it in one scan.

1:1 mentoring & support desk

A mentor for the career decisions and a ticketed support desk for everything else, both inside the LMS.

The placement engine. You don't apply into a black hole.

You get presented — through three channels, by our team, with your profile optimised first.

01 · **NAUKRI, DONE RIGHT**

Profile built by our team

Your CV professionally optimised and loaded on Naukri by our team — not left to you.

02 · **3,000+ HR NETWORK**

Broadcast to recruiters

Your profile shared across our network of recruiters and HR professionals actively hiring.

03 · **DIRECT CLIENTS**

Straight to hiring companies

Shared directly with our client companies hiring for this role right now.

CAREER SERVICES INCLUDED

SERVICE

WHAT YOU GET

ATS Resume Building

A resume that survives the filter and gets read by a human

LinkedIn & GitHub

Profile optimised for recruiter search; portfolio that showcases real work

Mock Interviews

Weekly technical + HR mocks, AI-analysed, with detailed feedback

Communication Training

A scored module — not an add-on. Delivery is what converts skill into offers

Interview Question Bank

Live bank drawn from monitored interviews for this role, this month

1:1 Mentoring

Personalised guidance at every step until you're hired

READINESS IS DECIDED ON DATA

We send you to interviews when your mock scores say you're ready — not when a sales target says so. That is precisely why our attend-to-place rate is what it is.

Fees that bet on you. Most of it only after you're placed.

YOUR PATH — EVERYTHING IS FREE UNTIL STEP 04

FREE • 01

Free counselling + written Career Analysis Report

Talk to us. You leave with a written report on where you stand and what to do — whether you join or not.

FREE • 02

Free live Masterclass

See the method live. How the syllabus is reverse-engineered from real interviews, and what you'd actually study.

FREE • 03

Free 7-hour Python Bootcamp

Sit a real teaching day before you decide. Seven hours of live Python — no card, no commitment.

STEP 04

Registration — ₹30,000

Only after all three free steps. EMI available: 3 × ₹10,000. Then full enrolment and LMS access.

Registration (payable only after the free masterclass + bootcamp)

₹30,000

EMI option for registration

3 × ₹10,000

Placement fee — due only after you accept an offer

First 3 months' CTC

Paid as

6 monthly EMIs from your new salary

Your ₹30,000 registration

Adjusted inside the placement fee

WORKED EXAMPLE • ₹12 LPA OFFER

3 months' CTC = ₹3,00,000 — ₹30,000 already paid = ₹2,70,000 in 6 EMIs — paid from a salary you didn't have before. We only earn properly when you do.

30-day money-back guarantee

Any reason, or no reason — full refund in your first 30 days of the program. No questions asked. Written into your agreement.

Don't trust us. Verify us.

Every institute will tell you their course is the best. So don't decide on anyone's words — including ours. Here is exactly how to check the market yourself, tonight, in fifteen minutes, for free.

CHECK 01 · 5 MIN

Count the demand

Open Naukri → search the role + your city → filter “Last 7 days” → count the postings. If hiring is real, you'll see it in the number.

CHECK 02 · 5 MIN

Read 5 job descriptions

Note the skills that repeat. Then compare them against any institute's syllabus — ours included. A syllabus that doesn't match live JDs is preparing you for the wrong exam.

CHECK 03 · 5 MIN

Pressure-test everyone

Ask every institute: will you put every promise in writing? Is your success rate defined clearly? Do you guarantee a job? Compare the answers.

What we promise — in writing

- ✓ Every commitment you get from us is in writing.
- ✓ Three full steps are free before you pay a rupee.
- ✓ The placement fee is due only after you accept an offer.
- ✓ 30-day money-back guarantee — any reason, full refund.
- ✓ Every counselling call is recorded & AI-monitored.

What we will never tell you

- ✗ “We guarantee you a job.” Nobody honestly can — the market decides.
- ✗ “We'll adjust your experience.” We never fabricate employment.
- ✗ A fixed salary promise.
- ✗ That hiring is certain, or that there's a shortcut.

QUESTIONS TO ASK ANY INSTITUTE — INCLUDING US

- Will you put every promise — fees, refund, placement process — in a written agreement?
- Is your success rate defined clearly? Ours: 98% of candidates who attend interviews, internal data.
- Do you guarantee a job? The only honest answer is no.
- Will anything on my CV be fabricated? With us: never — real projects and a real internship only.

Real stories. Real people. Real success.

★★★★★ DEVOPS

"Big thanks to Trainer Krish for being such a motivating and knowledgeable guide. Your way of teaching with real-life examples made everything so easy to understand. You're not just a trainer, but a true mentor!"

KR Sampritha

★★★★★ DATA ENGINEERING

"The course is super well-structured, covering everything from ETL processes to data storage tools. Instead of just theory, I got to work on actual data pipelines and industry-relevant case studies."

Anish Lakumarapu

★★★★★ DATA ENGINEERING

"I would like to sincerely thank BrowseJobs for their incredible support in helping me find a job. Krish Sir, you are doing a wonderful job in helping students who dream of working in the IT industry."

Saket Vaibhav

★★★★★ DEVOPS

"I recommend BrowseJobs to anyone looking to advance their career in IT. The course was comprehensive, well-structured, and tailored. My tutor was always available to clear any doubts."
