

**BrowseJobs.ai**

THE WORLD'S FIRST AI-DRIVEN SKILLING & PLACEMENT PLATFORM

CAREER PROGRAM · PYTHON BACKEND

Python Backend

Production Python for the backend roles companies are hiring for — Django APIs, real databases, and the engineering practices interviews test. A six-month, project-first program whose syllabus is rebuilt every month from real backend interviews.

6 MONTHS · LIVE ONLINE · BENGALURU · 2026 EDITION

50/day

real interviews monitored by our AI

~90%

of interview questions come from our material*

98%

of candidates who attend interviews get placed*

1 year

unlimited live batches & recordings

₹30,000 TO ENROL · THE DEPLOYMENT FEE ONLY ONCE YOU'RE EARNING · 30-DAY MONEY-BACK GUARANTEE

GitHub · your second CV	8	Real stories, real people	14

Most institutes teach a syllabus. We prepare you for the interview.

The problem with every other course: fixed syllabi written years ago, packed with topics no interviewer asks about — while the questions that decide your offer change every quarter. You spend months studying, then walk into interviews prepared for the wrong exam.

THE SYLLABUS ENGINE — REBUILT MONTHLY

This syllabus was not written. It was reverse-engineered.

*Based on BrowseJobs internal data. Historical figures — not a promise of individual outcome. Hiring depends on the live market and your performance.

WHAT THAT TURNS INTO, WEEK TO WEEK

THE MARKET

Why backend engineering stays the most portable skill in software

Every product needs an API, a database and someone who can keep both up. Backend is the least fashion-driven track we run, which is exactly why it stays hireable — the framework names change, the questions about data modelling, correctness and scale do not.

Built for your situation. Judged on **your outcomes.**

SWITCHING DOMAINS?

The real, industry-grade projects you build here become the centerpiece of your CV — hands-on work in the new domain, fully genuine, fully BGV-safe.

CAREER GAP?

A structured internship with us, built around projects you actually deliver, fills your timeline with documented work. A gap is only a gap if it's empty.

FRESHER?

Earn a free internship certificate with BrowseJobs.ai — the equivalent of six months of hands-on experience before your first interview.

WHAT YOU'LL WALK OUT ABLE TO DO

- ✓ Design and ship production REST APIs with Django and Django REST Framework
- ✓ Model data properly in PostgreSQL — schemas, indexes, transactions and migrations
- ✓ Secure an API the way interviews expect: auth, authorization, validation and rate limits
- ✓ Run background work and async I/O without breaking under load
- ✓ Answer the system-design and debugging questions backend interviews lead with

ROLES THIS PREPARES YOU FOR

- Backend Developer
- Python Developer
- API Developer
- Software Engineer
- Platform Engineer

PROGRAM FORMAT

Duration	6 months
Format	Live online + recordings
Access	1 year unlimited
Projects	3 CV-ready, all deployed

THE DIFFERENCE, IN FIVE LINES

	A TYPICAL INSTITUTE	BROWSEJOBS
Where the syllabus comes from	Written once, revised rarely	Rebuilt monthly from monitored interviews
When you go to interview	When the batch ends	When your mock data says you're ready
What you can show an employer	Certificates and slide decks	A deployed API and its test suite on a public GitHub
When the fee falls due	Up front, before you have seen a class	After three free steps — counselling, masterclass, bootcamp
What is in writing	A brochure	The agreement, and every call recorded

"We qualify you on data points, not emotions. Your mock-interview data decides when you're ready — and then the market meets you."

DR. KRISH BHARGAV · FOUNDER & MENTOR

The live syllabus.

Rebuilt monthly from real interviews.

10 modules. Zero filler. Every topic below appeared in a monitored interview for this role — that is the only reason it is here.

MODULE 01

Python for Backend Engineering

Core Python through to the depth interviewers actually probe.

- Data types, collections, comprehensions, slicing
- Functions, arguments, closures, decorators
- Classes, inheritance, dunder methods, dataclasses
- Modules, packaging, virtual environments, dependency management
- Exceptions, context managers, file and JSON handling
- Type hints and static checking

MODULE 02

Clean Code & Testing

The round that separates a scripter from an engineer.

- SOLID principles applied to real Python
- pytest and pytest-django: fixtures, parametrize, mocking, coverage
- Test-driven development on a real feature
- Debugging, logging and profiling
- Git workflow: branches, pull requests, code review

MODULE 03

Databases & SQL

Backend interviews are database interviews wearing a different hat.

- PostgreSQL fundamentals, data types, constraints
- Joins, aggregations, subqueries, window functions
- Schema design, normalization, indexing strategy
- Transactions, isolation levels, deadlocks
- Django ORM: querysets, relationships, select_related and the N+1 problem
- Django migrations and safe schema change

MODULE 04

Django & Production APIs

The framework named in most current Python backend job descriptions.

- Project and app layout, settings, URLs, views
- Django REST Framework: serializers, viewsets, routers
- Request/response validation and a consistent error envelope
- REST design, status codes, versioning, pagination and filtering
- Django admin, management commands, signals
- OpenAPI schema generation and testing endpoints with the DRF test client

MODULE 05

Authentication, Authorization & Security

The area candidates most often get caught out on.

- Password hashing, sessions vs tokens, JWT and refresh flows
- OAuth2 and third-party login
- Django permissions, groups and role-based access control
- OWASP Top 10 for APIs: injection, IDOR, SSRF, mass assignment
- Secrets management, CORS, CSRF, rate limiting

MODULE 06

Async Python, Queues & Background Jobs

Where "it worked on my laptop" stops being good enough.

- asyncio, coroutines, the event loop, Django async views
- Blocking vs non-blocking I/O — and how to tell which you wrote
- Celery: queues, workers, retries, idempotency
- Scheduled jobs and long-running task patterns
- WebSockets and server-sent events with Django Channels

WHAT EVERY MODULE SHIPS WITH

Live class + recording

Instructor-led, then searchable by topic for a year.

Lab exercises

Run in the browser against the real stack, not a slide.

Graded assignment

Scored with written trainer feedback, fed into your PRI.

This month's questions

The interview questions monitored for this exact topic.

Modules 07 → 10

MODULE 07

Performance & Scale

The system-design conversation, made concrete.

- Query optimization and hunting down the N+1
- Database connection pooling and tuning
- Load testing and finding the real bottleneck
- Horizontal scaling, statelessness, load balancing
- Observability: structured logs, metrics, tracing

MODULE 08

CI/CD & Cloud Deployment

Shipping it — because a project that isn't deployed doesn't count.

- GitHub Actions: test, build and deploy pipelines
- Environment configuration and twelve-factor practice
- Gunicorn and nginx, static and media file handling
- Deploying to AWS: EC2, RDS, S3, load balancing
- Zero-downtime deploys, health checks and rollback

MODULE 09

System Design for Backend Interviews

The round that decides your level — and your offer.

- Requirements, estimation and trade-off reasoning
- Designing a URL shortener, a rate limiter, a feed
- SQL vs NoSQL, sharding, replication, consistency
- Message queues and event-driven architecture
- Microservices vs monolith — and defending your choice

MODULE 10

Interview Engineering

The module no other institute has — because no one else monitors 50 interviews a day.

- Live question bank from monitored interviews, refreshed monthly
- Weekly technical + HR mock interviews, AI-analysed
- Live coding and debugging drills under time pressure
- Communication & confidence coaching — scored, not optional

HOW THE TEN MODULES LAND ACROSS SIX MONTHS

Six months, month by month

COACH NOTE · EXPLORE LATER

The core program covers what the monitored interviews actually test. If a specific JD reaches past it, here is your self-study map — and your mentor will point you at the right one when it matters.

Docker & containers

Redis caching strategies · TTLs, invalidation

FastAPI · the async-first alternative

GraphQL with Strawberry

Kubernetes basics

Real projects you'll build.

These go on your CV.

Not toy exercises — industry-grade work you deliver, deploy and can walk an interviewer through line by line. Fully genuine, so every candidate clears background verification.

01

Production REST API

A multi-resource Django API with auth, validation, pagination and a full test suite.

- ✓ Django + DRF + PostgreSQL
- ✓ JWT auth & role-based access
- ✓ Migrations & fixtures
- ✓ 90%+ test coverage

02

Async job processing service

Queue-backed background work with retries, idempotency and monitoring.

- ✓ Celery workers
- ✓ Retry & dead-letter handling
- ✓ Scheduled jobs
- ✓ Worker metrics

03

Automated deployment pipeline

Commit to running service on AWS, automatically, with rollback.

- ✓ GitHub Actions CI/CD
- ✓ Environment config & secrets
- ✓ Deploy to EC2 + RDS
- ✓ Health checks & rollback

THREE, NOT TWELVE

Depth is what gets cross-examined.

A CV listing twelve weekend projects invites one question: which of these did you actually build? Three deep ones invite forty minutes of technical conversation you are ready for — the schema you would change, the query that got slow, the bug that only appeared under load.

Each runs for weeks, and each ends up deployed, version-controlled and defensible line by line.

WHAT YOU ARE ACTUALLY BUILDING

THE REQUEST PATH

THE BACKGROUND LANE

Every hop instrumented · structured logs, metrics, health checks

THE STACK YOU'LL HAVE USED

Python Django Django REST Framework

PostgreSQL Django ORM Celery

Redis (queue) pytest pytest-django

Gunicorn & nginx GitHub Actions

AWS (EC2, RDS, S3) Git & GitHub

EVERY PROJECT SHIPS WITH ALL FOUR — THAT IS WHAT MAKES IT AN INTERVIEW ANSWER

A public repo

On your GitHub, with a README an interviewer can follow.

A running deployment

In your own cloud account, not a screenshot.

Green CI

Tests and lint passing on every push, publicly visible.

A 3-minute walkthrough

Rehearsed in mocks until you can give it cold.

Your projects don't stop at localhost.

Every CV-ready project in this program is deployed, not just coded. An interviewer can open it, and you can walk them through the pipeline that put it there — which is exactly the conversation that converts a project into an offer.

01

Your own cloud account

You build in a real AWS or Azure account with real IAM, real billing alarms and real limits — not a simulator.

02

Version-controlled from day one

Git and GitHub from the first commit, with branches, pull requests and review — the workflow your first team will expect.

03

Automated build & deploy

A GitHub Actions pipeline takes each project from commit to running environment, so deployment is a repeatable step rather than a one-off.

04

Monitored and demoable

Dashboards, logs and alerts on top, plus a written architecture walkthrough you rehearse in mock interviews.

THE LAB YOU PRACTISE IN

```

1 $ pytest api/tests -q --cov=api
2 api/tests/test_orders.py .....
3 api/tests/test_auth.py .....
4 api/tests/test_perms.py ....
5
6 ----- coverage: 94% -----
7 15 passed in 1.84s

✓ all green · coverage gate passed
ready to push · CI will run this again
  
```

Browser-based labs with the real stack. You write, run and break things inside the LMS — no local setup standing between you and practice.

PROOF AN EMPLOYER CAN CHECK

Every certificate carries a QR code that resolves to a public verification page. Nothing on your CV is unverifiable, and nothing is fabricated.

Recruiters open your GitHub before they call you back.

A CV is a claim. A repository is evidence. You work in Git and GitHub the way a real backend team does from module 02 onward — so by month six you own a public portfolio of working APIs, migrations and test suites that answers the interviewer's questions before they ask them.

your-handle / **django-orders-api** Public

django drf postgresql celery aws

✓ All checks have passed build · tests · lint

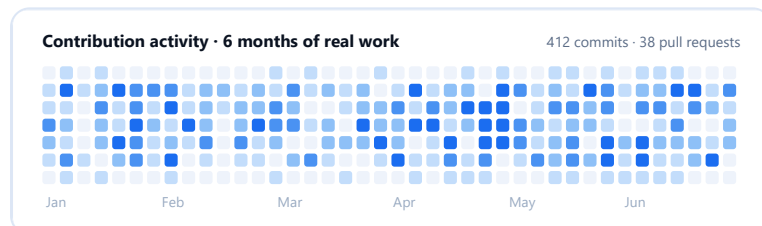

README.md	architecture, diagram, how to run	2 days ago
orders/models.py	add index on created_at	3 days ago
api/serializers.py	fix N+1 on order lines	5 days ago
api/views.py	paginate + filter the list view	6 days ago
.github/workflows/ci.yml	run pytest on every push	1 week ago
deploy/	gunicorn + nginx on ec2	2 weeks ago

your-handle
Data Engineer · Bengaluru · open to work

WHAT A RECRUITER SEES IN 30 SECONDS

- ✓ Profile README who you are, what you build
- ✓ 3 pinned repos one per CV project, all deployed
- ✓ Green CI on each tests run on every push
- ✓ Dated commit history six months, not one dump
- ✓ Topics match the JD django, drf, postgresql
- ✓ No secrets committed OIDC and GitHub Secrets

Nothing here is fabricated — which is why it survives BGV.

01

A repository per project

Three public repos, one for each CV project, each with a README written the way an interviewer reads: problem, architecture diagram, how to run it, what you'd do next.

02

Six months of dated commits

Real history — branches, small commits, messages that explain intent. Not one "initial commit" dump uploaded the night before an interview.

03

Pull requests, reviewed

Every change lands through a PR your mentor reviews, exactly like the team you're about to join. You practise defending a design before anyone pays you to.

04

CI that actually runs

GitHub Actions on every push: lint, tests, build. The green check is public, on the repo, and it is the fastest credibility signal you own.

05

Secrets handled properly

No keys in the repo. SECRET_KEY and database URLs out of settings.py, .env ignored, GitHub Secrets and OIDC into AWS — and you can explain why, because it gets asked.

06

A profile arranged for recruiters

Pinned repos, a profile README, and topics tagged with the keywords in live JDs, so a thirty-second scan lands on your best work first.

The whole machine, from day one.

No add-on pricing for the things that get you hired. Every tool below ships with this track, inside the fee you already paid.

AI Tutor — awake at 2am

Every doubt answered in seconds, in your context, from your syllabus. Students ask it hundreds of questions a course, because it never judges and never sleeps.

Voice Mock Lab — the interviewer that calls you

A voice AI rings your phone, runs a real technical round, and scores every answer on depth, communication and confidence. By the twelfth mock, the real thing feels like a rerun.

PRI & the mastery map

A Placement Readiness Index built from your mock data, attendance and assignments — with one clear next best action every day.

Job Title	Match
Backend Developer - Bengaluru	96% match
Python Developer - Hyderabad	91% match
API Developer - Pune	84% match
Software Engineer - Remote	79% match

Job Radar

Live roles from LinkedIn and Naukri matched to your skill graph and refreshed daily, so the openings are already waiting when you are ready.

Live batches + recordings

Every class is live and instructor-led, then recorded and searchable by topic. Your access runs a full year, so a missed class is never a lost one.

Weekly technical + HR mocks

Human-led mocks alongside the AI ones, AI-analysed afterwards, each returning a written gap report rather than a grade.

Content Hub & lesson notes

Per-lesson notes, slides and reference material, generated against the day's teaching plan and kept with the recording.

Live interview question bank

The questions pulled from monitored interviews for your role this month, organised round by round.

Quizzes, assignments & graded feedback

Scored work with trainer feedback, so readiness is a measurement rather than an opinion.

ATS resume, LinkedIn & GitHub

Your CV rebuilt to survive the filter, your LinkedIn tuned for recruiter search, your GitHub arranged around the projects you actually shipped.

Verifiable certificates

Every certificate carries a QR code that resolves to a public verification page. An employer checks it in one scan.

1:1 mentoring & support desk

A mentor for the career decisions and a ticketed support desk for everything else, both inside the LMS.

You don't apply into a black hole.

You get presented — through three channels, by our team, with your profile optimised first.

CAREER SERVICES INCLUDED — AT NO EXTRA COST

SERVICE — WHAT YOU GET	
ATS Resume Building	A resume that survives the filter and gets read by a human
LinkedIn & GitHub	Profile optimised for recruiter search; portfolio that showcases real work
Mock Interviews	Weekly technical + HR mocks, AI-analysed, with detailed feedback
Communication Training	A scored module — not an add-on. Delivery is what converts skill into offers
Interview Question Bank	Live bank drawn from monitored interviews for this role, this month
1:1 Mentoring	Personalised guidance at every step until you're hired

READINESS IS DECIDED ON DATA

We send you to interviews when your mock scores say you're ready — not when a sales target says so. That is precisely why our attend-to-place rate is what it is.

IF THE FIRST CYCLE DOESN'T LAND

Your access runs a full year, and it is unlimited. Sit the live batch again, re-take the mocks, rebuild the weak module, get presented again — at no additional cost, because there is no additional cost in this program. The fee you paid at the start is the whole of it.

AFTER EVERY INTERVIEW — THE FEEDBACK LOOP

01

Debrief within 24h

You and your mentor reconstruct the round question by question, while it is still fresh.

02

Gaps go into the bank

Anything you fumbled is added to the live question bank for you — and for the next cohort.

03

Targeted re-prep

Your PRI updates and your next best actions change to attack exactly those gaps.

04

Presented again

Back into the three channels. No queue, no waiting for a new batch, no extra invoice.

₹30,000 to enrol. The rest, **only once you're earning.**

There are two fees, and they are written into your agreement before you pay a rupee. The enrollment fee is what it costs to join. The deployment fee is a share of the salary this program helps you win — and it does not exist until you are deployed and drawing that salary.

ENROLLMENT FEE

₹30,000

Covers the six-month program — live classes, LMS, labs, mocks, career services and a full year of access. Payable only after the three free steps.

EMI $3 \times ₹10,000$ · or pay in full

WHAT THE ENROLLMENT FEE COVERS

Enrollment fee (payable after the free masterclass + bootcamp)	₹30,000
EMI option	$3 \times ₹10,000$
Live classes, recordings and the coding lab	Included
Mock interviews, question bank and career services	Included
Repeating batches, 1:1 mentoring and certificate	Included

YOUR PATH — EVERYTHING IS FREE UNTIL STEP 04

FREE · 01

Free counselling + written Career Analysis Report

Talk to us. You leave with a written report on where you stand and what to do — whether you join or not.

FREE · 02

Free live Masterclass

See the method live. How the syllabus is reverse-engineered from real interviews, and what you'd actually study.

FREE · 03

Free 7-hour Python Bootcamp

Sit a real teaching day before you decide. Seven hours of live Python — no card, no commitment.

STEP 04

Enrol — ₹30,000

Only after all three free steps. Pay in full or $3 \times ₹10,000$. Full enrolment, LMS access, and the 30-day guarantee running.

LATER · THE DEPLOYMENT FEE

Three months' CTC, once you are deployed and earning.

Nothing more is due while you are studying. The deployment fee arises only after you are deployed, and it is paid out of the salary that placement brings — in six monthly instalments, with the ₹30,000 you have already paid adjusted inside it, never charged twice.

No deployment, no fee. It is a share of a salary — if the salary never arrives, neither does the invoice.

WORKED EXAMPLE · ₹12 LPA OFFER

Three months' CTC	₹3,00,000
– enrollment fee already paid	– ₹30,000
Deployment fee	₹2,70,000
= 6 monthly instalments of	₹45,000

Paid from a salary you did not have before.

FEE QUESTIONS, ANSWERED PLAINLY

When exactly do I pay?

Only after all three free steps — never before, and never to reserve a seat.

What does the EMI actually look like?

Three monthly instalments of ₹10,000. No interest charged by us, no third-party loan, no credit check.

What if I am never deployed?

The deployment fee never arises. No salary, no invoice — the ₹30,000 stays the only money paid.

Thirty days to change your mind. No conditions.

The guarantee below is not marketing copy. It is a clause in the agreement you sign, written out in full here so there is nothing to discover later.

30-day money-back guarantee

Full refund of the enrollment fee · written into your enrolment agreement

- 01 **The window.** 30 calendar days, counted from the day of your masterclass or bootcamp* — not from the day you paid, and not from your first live class.
- 02 **The reason.** Any reason, or no reason at all. You are not required to justify the decision, sit an exit interview, or be talked out of it.
- 03 **The amount.** 100% of what you have paid us. The full ₹30,000, or every EMI instalment received to date — with no deduction for classes attended, recordings watched, materials issued or LMS usage.
- 04 **No admin charges.** No processing fee, no registration retention, no restocking charge. The number you paid is the number that comes back.
- 05 **How to claim.** One written request is enough: email hello@browsejobs.ai or raise a ticket on the support desk inside the LMS. The date your request reaches us is the date that counts, even if it is day 30.
- 06 **When you are paid.** Processed within 7 working days of your request, refunded to the original payment method. Bank settlement timelines are outside our control, but our side is done in 7.
- 07 **What ends on refund.** LMS access, mentoring and placement services close on the refund date, and any certificate already issued is withdrawn. Nothing else follows you.
- 08 **Where it lives.** This clause is printed in your enrolment agreement before you pay. If a promise is not in writing, it is not a promise — hold us to that, and every other institute too.

***The 30 days are counted from the day of your masterclass or bootcamp** — whichever you attend first. Because those two sessions are free and come before you pay, your refund window is already running by the time you enrol, and you have seen us teach before a single rupee moves.

And the honest limit: after day 30 the fee is non-refundable. That is the trade for a window with no conditions inside it — and we would rather print the sentence here than let you discover it later.

CLAIMING IT — THREE STEPS, NO GATEKEEPING

01

Write one line

Email hello@browsejobs.ai or open a ticket in the LMS. "I'd like my refund" is a complete request — you do not owe us an explanation.

02

We acknowledge in writing

You get a written confirmation with your claim date and the refund amount, so nothing depends on anyone's memory of a phone call.

03

Money back in 7 working days

Returned to the account you paid from. No exit call to sit through, no retention offer, no conditions attached.

Don't trust us. **Verify us.**

Every institute will tell you their course is the best. So don't decide on anyone's words — including ours. Here is exactly how to check the market yourself, tonight, in fifteen minutes, for free.

CHECK 01 · 5 MIN

Count the demand

Open Naukri → search the role + your city → filter "Last 7 days" → count the postings. If hiring is real, you'll see it in the number.

CHECK 02 · 5 MIN

Read 5 job descriptions

Note the skills that repeat. Then compare them against any institute's syllabus — ours included. A syllabus that doesn't match live JDs is preparing you for the wrong exam.

CHECK 03 · 5 MIN

Pressure-test everyone

Ask every institute: will you put every promise in writing? Is your success rate defined clearly? Do you guarantee a job? Compare the answers.

WHAT WE PROMISE — IN WRITING

- ✓ Every commitment you get from us is in writing.
- ✓ Three full steps are free before you pay a rupee.
- ✓ ₹30,000 to enrol; the deployment fee only once you are deployed and earning.
- ✓ 30-day money-back guarantee — any reason, full refund.
- ✓ Every counselling call is recorded & AI-monitored.

WHAT WE WILL NEVER TELL YOU

- ✗ **"We guarantee you a job."** Nobody honestly can — the market decides.
- ✗ **"We'll adjust your experience."** We never fabricate employment.
- ✗ **A fixed salary promise.** Packages depend on your profile, performance and the live market.
- ✗ **That hiring is certain, or that there's a shortcut.** Our numbers are real because our students show up.

QUESTIONS TO ASK ANY INSTITUTE — INCLUDING US

- ✓ Will you put every promise — fees, refund, placement process — in a written agreement?
- ✓ Is every fee, and the date it falls due, written into the agreement before I pay?
- ✓ Is your success rate defined clearly? Ours: 98% of candidates who attend interviews, internal data.
- ✓ Do you guarantee a job? **The only honest answer is no.**
- ✓ Will anything on my CV be fabricated? With us: never — real projects and a real internship only.

EVERY CALL IS RECORDED & AI-MONITORED

Not for your benefit alone — for ours. If a counsellor cannot promise something on a recorded call that our AI reviews, they cannot promise it at all. That is the mechanism behind "every promise in writing", and it is why the sentences in this brochure are as careful as they are.

IF OUR ANSWERS DON'T HOLD UP

Then don't enrol. Three steps are free precisely so that you can test the claims on this page against a real teaching day before any money changes hands — and if you do enrol and change your mind, the thirty days on page 12 are your way back out.

Real stories. Real people.

Real success.

DEVOPS

"Big thanks to Trainer Krish for being such a motivating and knowledgeable guide. Your way of teaching with real-life examples made everything so easy to understand. You're not just a trainer, but a true mentor!"

K

KR Sampritha

DATA ENGINEERING

"The course is super well-structured, covering everything from ETL processes to data storage tools. Instead of just theory, I got to work on actual data pipelines and industry-relevant case studies."

A

Anish Lakumarapu

DATA ENGINEERING

"I would like to sincerely thank BrowseJobs for their incredible support in helping me find a job. Krish Sir, you are doing a wonderful job in helping students who dream of working in the IT industry."

S

Saket Vaibhav

DEVOPS

"I recommend BrowseJobs to anyone looking to advance their career in IT. The course was comprehensive, well-structured, and tailored. My tutor was always available to clear any doubts."
