Pricing & Packages

What each tier includes, what is metered, and the three ways to buy.

COMMERCIAL

IBROWSEJOBS TECHNOLOGIES PVT LTD · 2026 EDITION

Commercial in confidence. Prepared for evaluation by the named recipient and not for onward distribution.

PACKAGES

Three tiers.

Tiers are enforced by per-tenant feature flags, so moving between them is a configuration change rather than a migration.

Starter

A single-location institute running its first cohorts.

[SET]

- ✓ Full LMS: curriculum, live classes, assignments, quizzes, certificates
- ✓ Student portal on a browsejobs.ai subdomain
- ✓ Whitelabel name, logo and colour palette
- ✓ Standard mock interviews (no voice AI)
- ✓ Email support, next business day

Capped active students · single admin workspace · shared infrastructure

Growth

An institute running admissions and placement as a business.

[SET]

- ✓ Everything in Starter
- ✓ Full institute CRM: leads, campaigns, fees, finance, HR, support desk
- ✓ Your own domain
- ✓ Voice mock lab and AI tutor, with a monthly AI allowance
- ✓ Placement pipeline and job feed
- ✓ Priority support with a defined response SLA

Higher student cap · AI usage beyond the allowance billed as overage

Enterprise

Multi-branch groups, or institutes with their own compliance bar.

[SET]

- ✓ Everything in Growth
- ✓ Employer workspace and hiring pipeline
- ✓ Dedicated database instance
- ✓ Custom integrations and data migration
- ✓ Named account manager and a contractual SLA
- ✓ Security review support and a signed DPA

Scoped per engagement

A marked price field is set for your volume on the order form. Nothing is charged without a written agreement first.

THREE WAYS TO BUY

MODEL	HOW IT WORKS
Licence subscription	A monthly or annual platform fee by tier, plus a one-time onboarding fee. Predictable for both sides, and the default.
Revenue share	A lower platform fee against an agreed share of course revenue. Suits a partner starting from zero cohorts who would rather pay as they grow.
Per-seat enrolment fee	A flat fee per enrolled student with no monthly minimum. Suits seasonal or cohort-driven institutes.

HOW IT IS PRICED

Five axes. One meter that matters.

AXIS

WHY

Active students per month

The primary meter. It tracks the value a partner gets and scales with their success rather than their headcount.

AI usage

Voice mocks, the AI tutor and AI screening calls carry a real per-call cost, already metered per tenant in `ai_events`. Each tier includes an allowance; beyond it, usage is billed at cost plus a stated margin.

Modules enabled

Tiers are enforced by the per-tenant feature flags the platform already reads, so a package is a configuration rather than a different build.

Deployment

Shared infrastructure by default; a dedicated database instance is an Enterprise option.

Support tier

Response times and escalation path, set out in the SLA.

WHY AI IS METERED AND NOT BUNDLED

Voice mock interviews, the AI tutor and AI screening calls carry a genuine per-call cost. The platform already records purpose, model, tokens, cost and latency for every AI call, per tenant. Charging a flat unlimited fee would mean the heaviest user is the worst margin, so each tier carries an allowance and overage is billed against that record.

BILLING NOTES

- ✓ Fees are quoted exclusive of GST.
- ✓ AI usage above the tier allowance is billed monthly in arrears against the metered record.
- ✓ Third-party costs on your own accounts — Zoom, payment gateway, WhatsApp — are never marked up by us.
- ✓ Annual commitments are invoiced in advance; monthly plans in advance, per month.
- ✓ The onboarding fee is one-time and is due before implementation begins.
